MKOMBOZI COMMERCIAL BANK PLC
REPORT OF THE DIRECTORS
FOR THE YEAR ENDED 31 DECEMBER 2019

1. INTRODUCTION

The directors submit their report together with the audited financial statements for the year ended 31 December 2020, which disclose the state of affairs of Mkombozi Commercial Bank Public Limited Company ("Mkombozi Commercial Bank Plc" or the "Bank").

2. INCORPORATION

The Bank was incorporated as a public limited liability company in Tanzania in 2007 under the Companies Act, No12 of 2002.

3. VISION

To be a leading Bank in addressing the growth needs of small and medium size enterprises through delivery of high quality and integrity banking services to a wide micro customer base and corporate enterprises.

4. MISSION

To be a Bank that will provide high quality financial services to all sectors of the economy in a sustainable and socially responsible manner to meet stakeholders' expectations.

5. PRINCIPAL ACTIVITIES

The principal activity of the Bank is the provision of banking and related services stipulated in the Banking and Financial Institutions Act, 2006 of Tanzania. There has been no change in the principal activities of the Bank during the financial year.

6. SHARE CAPITAL STRUCTURE

The Bank's share capital structure for the year under review is shown below: -

Authorized share capital

TZS 50,000,000,000 comprising 50,000,000 ordinary shares of TZS 1,000 each.

Called up and fully paid up share capital

TZS 20,615,272,000 comprising 20,615,272 ordinary shares of TZS 1,000 each.

7. SHAREHOLDING STRUCTURE

As at 31 December 2020, the shares of the Bank were held as follows:

Category	No of shares	Value of shares (TZS)	% of holding
Church dioceses and affiliated institutions	5,777,708	5,777,708,000	28.0%
Other institutions	2,125,907	2,125,907,000	10.3%
Tanzania Episcopal Conference (TEC)	4,133,995	4,133,995,000	20.1%
Individuals	8,577,662	8,577,662,000	41.6%
Total	20,615,272	20,615,272,000	100.0%

As at 31 December 2019, the shares of the Bank were held as follows:

MKOMBOZI COMMERCIAL BANK PLC

REPORT OF THE DIRECTORS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

8. DIRECTORS (Continued)

The following directors held shares in the Bank as at the respective year-ends:

Name of the director	Number of shares held	
	2020	2019
Most Rev. Beatus Kinyaiya	13,574	13,574
Prof. Marcellina Mvula Chijoriga	17,000	17,000
Mr. Ayoub Mtafya	6,250	6,250
Mr. Robert Mtendamema	1,190	1,190
Total shares held by directors	38,014	38,014

No director owned more than 0.3% of total issued share capital of the Bank.

9. COMPANY SECRETARY

The Bank's Secretary as at 31 December 2020 was Mr. Baltazar Mbilinyi.

10. CORPORATE GOVERNANCE

The Board of Directors (the "Board") consists of eight directors including the Managing Director. Other than the Managing Director, no director holds an executive position in the Bank. The Board has overall responsibility for the Bank, including responsibility for identifying key risk areas, considering and monitoring investment decisions, considering significant financial matters, and reviewing performance by management against business plans and budgets.

The Board is also responsible for ensuring that a comprehensive system of internal control policies and procedures, which is compliant with sound corporate governance principles, is operative.

The Board is required to meet at least four times a year. The Board delegates the day to day management of the business to the Managing Director who is assisted by the Bank's Management Team. The Management Team is invited to attend Board meetings and facilitates the effective control of the Bank's operational activities, acting as a medium of communication and coordination between the various business units.

During the year, the Board held four ordinary meetings and four extraordinary meetings due to special activities that necessitated the Board's deliberations. The Board meetings held during the year are as summarized below:

No.	Name of the director	Position	Total meetings	Meetings attended	%
1.	Prof. Marcellina Chijoriga	Board Chairperson	8	8	100%
2.	Most Rev. Beatus Kinyaiya	Director	8	8	100 %
3.	Mr. Ayoub Mtafya	Director	8	7	93.8%
4.	Mr. Robert Mtendamema	Director	8	8	100%
5.	Ms. Uphoo Swai	Director	8	7	93.8%
6.	Fr. Dr. Charles Kitima	Director	8	7	93.8%
7.	Mr. Sudi Warisianga	Director	8	8	100%

MKOMBOZI COMMERCIAL BANK PLC

REPORT OF THE DIRECTORS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

10. CORPORATE GOVERNANCE (Continued)

The Board has three committees, that is, the Board Audit, Risk and Compliance Committee, the Board Human Resources and Operations Committee and the Board Credit Committee. Each committee has a charter to govern its roles and responsibilities as well as facilitate efficiency and effectiveness of the Board's performance.

The Bank is committed to the principles of effective corporate governance, especially recognising the importance of integrity, transparency and accountability. The Board exercised close oversight over the Bank's operations and ensured high standards of corporate governance through its committees as shown below:

The Board Audit, Risk and Compliance Committee (BARCC) is composed of the following:

No.	Name of director	Position	Total meetings	Meetings attended	%
1.	Ms. Uphoo Swai	Chairperson	7	6	93.8%
2.	Most Rev. Beatus Kinyaiya	Director	7	6	93.8%
3.	Mr. Benedict Warisianga Sudi	Director	7	7	100%

The Board Credit Committee (BCC) is composed of the following:

No.	Name of director	Position	Total meetings	Meetings attended	%
1.	Mr. Robert Mtendamema	Chairperson	6	5	93.8%
2.	Mr. Ayoub Mtafya	Director	6	6	100%
3.	Fr. Charles Kitima	Director	6	6	100%
4	Mr. Benedict Warisianga Sudi	Director	6	5	93.8%

The Board Human Resources and Operations Committee is composed of the following:

No.	Name of director	Position	Total meetings	Meetings attended	%
1.	Mr. Ayoub Mtafya	Chairperson	5	5	100%
2.	Mr. Robert Mtendamema	Director	5	5	100%
3.	Fr. Charles Kitima	Director	5	5	100%

11. MANAGEMENT TEAM

The Managing Director was assisted by the following Heads of Departments:

• Chief Finance Officer • Chief Operations Officer • Head of Treasury • Head of Credit • Chief Internal Auditor	• Chief Commercial Officer • Head of Legal Services (Company Secretary) • Manager, Risk and Compliance Department • Manager, Human Resources Department
---	--

MKOMBOZI COMMERCIAL BANK PLC
REPORT OF THE DIRECTORS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

12. GOING CONCERN ASSESSMENT

The Directors have made an assessment of the going concern assumption and have concluded that the Bank is expected to continue in operational existence for the foreseeable future. The going concern assumption is therefore appropriate to be used in the preparation of these financial statements. In arriving at that conclusion, the Directors considered the strength of the Bank in terms of its history, clientele and overall management of the Bank's business that has ensured a robust performance in the past and its concrete plans and strategies that will see the Bank grow even stronger in the future.

Some of the important indicators of the Bank's performance are the following:

	2016	2017	2018	2019	2020
Core Capital	18,058m	20,341m	19,222m	8,606m	16,500m
Core Capital Ratio	22.04%	21.77%	15.33%	5.76%	11.08%
Total Capital Ratio	22.83%	22.54%	15.96%	5.76%	11.08%
Profit before tax	1,046m	1,442m	806m	(6,583m)	3,849m
Return On Equity (ROE)	7%	8%	6%	(23%)	19%
Earnings per share	50.75	69.99	39	(319)	187
Interest margin on earning assets	17%	5%	11%	12%	13%
Non - performing loans to gross loans	7%	7%	10%	20%	10%

The Board, due to unsatisfactory performance in 2019, took short term and long-term measures to ensure immediate improvement in 2020 and the years beyond. The short-term measures were very successful as depicted by the improved performance in the year 2020, while the long-term measures that involved capital build up plans are still under implementation. The successful implementation of the short-term measures is expected to be sustained in the year 2021 and beyond.

Some of the selected performance indicators as they compare to the previous year are the following:

- The absolute core capital increased from TZS 8,606 million as at 31 December 2019 to TZS 16,423 million as at 31 December 2020, while the minimum required is TZS 15,000 million.
- Core capital and total capital ratios improved from 5.76% and 5.76% respectively as at 31 December 2019 to 11.08% and 11.08% respectively as at 31 December 2020, while the minimum required core capital and total capital ratio is 12.5% and 14.5% respectively.
- Profitability improved from a net loss of TZS 6,583 million at 31 December 2019 to a net profit of TZS 3,849 million at 31 December 2020.
- The quality of the loan book improved from an NPL ratio of 20% at 31 December 2019 to 10% at 31 December 2020.

As part of the long-term plans the Bank had, towards the end of year 2020, embarked on capital build up through Rights Issue. As at 31 January 2021, the Bank had managed to raise TZS 2,205 million from the rights issue that makes the absolute core capital to be TZS 18,705 million. The success registered from the short-term initiatives and that which is expected from the rights issue will enable the Bank to not only restore the regulatory capital ratios but also make further investments in IT related projects and increase its outreach to customers through branch and agency networks.

More information on performance indicators is provided in paragraph 13 of the Directors report, and further information on the Bank's going concern and capital restoration plan is included in Note 2.2 and 5.5 of the financial statements.

MKOMBOZI COMMERCIAL BANK PLC

REPORT OF THE DIRECTORS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

13. FINANCIAL PERFORMANCE AND POSITION

The Bank reported a profit of TZS 3,849 million during the year ended 31 December 2020 (2019: Loss of TZS 6,583 million). The following achievements were recorded in terms of the financial position:

- The net operating income grew by 67% from TZS 11.84 billion as at 31st December 2019 to TZS 19.86 billion as at 31st December 2020;
- The deposits due to customers increased by 14% from TZS 161,926 million as at 31 December 2019 to TZS 183,908 million as at 31 December 2020;
- The total assets increased by 8% from TZS 204,038 million as at 31 December 2019 to TZS 219,979 million as at 31 December 2020;
- The total operating expenses decreased by 7.4% from TZS 17.28 billion as at 31st December 2019 to TZS 16.0 billion as at 31st December 2020;
- The loans and advances to customers book decreased slightly by 1% from TZS 122,084 million as at 31 December 2019 to TZS 121,381 million as at 31 December 2020; However, the quality of the book improved from the Non-Performing Ratio (NPL) of 20% as at 31st December 2019 to 10% as at 31st December 2020.

The key performance indicators (KPIs) of the Bank are indicated below: 381

Performance Indicator	Definition and calculation method	2020	2019
Return on equity	Profit/(loss) before tax/Total equity	19%	(23%)
Return on assets	Profit/(loss) before tax/Total assets	2%	(3%)
Cost to income ratio	Operating costs/Net interest + non-interest income	82%	105%
Interest margin on earning assets	Total interest income/(interest on government securities + balances with other banks + interbank loans receivable + investments in other securities + net loans, advances and overdrafts)	13%	12%
Non - interest income to gross income	Non - interest income/Total income	20%	20%
Earnings per share	Basic earnings/ Number of ordinary shares in issue (TZS)	187	(319)
Gross loans to customers deposits	Total loans and advances to customers/Total deposits due to customers	66%	75%

Earning assets to total assets	Earning assets/Total assets	85%	84%
Growth in total assets	Trend (2020/2019 total assets – 2019/2018 total assets)/(2019/2018 total assets)	8%	14%
Growth in loans and advances to customers	Trend (2020/2019 loans and advances – 2019/2018 loans and advances) /2019/2018 loans and advances)	-1%	23%
Growth in deposits due to customers	Trend (2020/2019 deposits – 2019/2018 deposits)/(2019/2018 deposits)	14%	19%
Capital adequacy			
Core (Tier 1) capital ratio	[Core capital/Total risk-weighted on and off statement of financial position, operational and market risk weighted exposures] x 100	11.08%	5.76%
Total (Tier 1 + Tier 2) capital ratio	[Total capital/Total risk-weighted on and off statement of financial position, operational and market risk weighted exposures] x 100	11.08%	5.76%

MKOMBOZI COMMERCIAL BANK PLC

REPORT OF THE DIRECTORS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

13. FINANCIAL PERFORMANCE AND POSITION (Continued)

The Bank reported a profit of TZS 3,849 million during the year ended 31 December 2020 (2019: a loss of TZS 6,583 million), and as at 31 December 2020, the Bank's core capital, core capital ratio and total capital ratio were TZS 16,423 million, 11.08% and 11.08% (2019: TZS 8,606 million, 5.76% and 5.76%) as compared to the minimum regulatory requirements of TZS 15,000 million, 12.5% and 14.5% respectively. The directors confirm that applicable accounting standards have been followed and that the financial statements have been prepared on a going concern basis.

14. NETWORK AND OUTREACH

The Bank had eleven branches as at 31 December 2020; four located in Dar es Salaam, and one each in Mwanza, Bukoba, Morogoro, Dodoma, Iringa Njombe and Moshi. The Bank's total number of depositors and borrowers as at the respective year-ends were as shown below:

Account type	<u>2020</u>	<u>2019</u>
Current accounts	3,304	2,837
Savings accounts	65,006	55,283
Time deposits	822	975
Total number of deposit accounts	<u>69,132</u>	<u>59,095</u>
Loan to customers' accounts	<u>21,267</u>	<u>12,839</u>

15. DIVIDEND

The directors do not propose payment of dividends for the year 2020 (2019: None).

16. KEY DEVELOPMENTS DURING THE YEAR

- Implementation of new business model and strategies which attributed to significant growth in clientele base and deposits momentum;
- Implementation of cost optimization initiatives which attributed to positive turnaround in the financial performance;
- Enhancement of credit origination and management framework which attributed to significant improvement in quality of loan portfolio;
- Introduction of new branch staffing model in view of enhancing staff productivity;
- Successful recapitalization of the business through internal sources as well as additional capital through Rights Issue.

17. RELATED PARTY TRANSACTIONS AND BALANCES

The related party transactions and balances are disclosed in Note 37 to the financial statements.

18. PLANNED DEVELOPMENT

The Bank will continue to focus on business opportunities arising in the economy especially in lending and other related activities. The Bank has the following plans:

- To launch digital banking solutions including Agency Banking, Mobile Banking Application, Internet Banking and Payment Solutions;
- To expand Bank's physical outreach through Agency Banking and Mini Branch outlets;
- To focus on niche market to drive business development ambitions with strategic emphasis in transforming the deposits mix between CASA (Current and Savings) and FD (Fixed Deposits) to 70% and 30% respectively in a medium term (1-2 years);
- To enhance credit origination and management framework with a view to achieving an NPL ratio of 5% in a medium term (1-2 years);
- To enhance cost optimization initiatives with a strategic focus to achieve a cost/income ratio of 55% in a medium term (1-2 years);
- To drive staff productivity through upskilling of staff and implementation of robust performance management framework;
- To enhance customer service management framework to improve service delivery across the board;
- To enhance innovation and investment in technology in order to deliver quality service and improve customer experience.

19. HUMAN RESOURCES

The Bank has adequate employees with pre-requisite competency and experience in key positions to manage the banking operations and pursue the business objectives.

20. PRINCIPAL RISKS AND UNCERTAINTIES

As the Bank continues to scale up its operations, it ensures that the resultant commercial and operational risks are mitigated through enforcement of appropriate policies and procedures. The Bank's activities expose it to risks including financial (liquidity, credit and market) and strategic risks. The Bank's overall risk management policies are approved by the Board and implemented by management. These policies involve analysis, evaluation, acceptance and management of some degrees of risks or a combination of risks. More details of the financial risks facing the Bank are presented in Note 5 to the financial statements.

21. RISK MANAGEMENT AND INTERNAL CONTROL

The Board accepts final responsibility for the risk management and internal control systems of the Bank. It is the task of the directors to ensure that adequate internal financial and operational control systems are developed and maintained on an ongoing basis in order to provide reasonable assurance regarding:

- The effectiveness and efficiency of operations;
- The safeguarding of the Bank's assets;
- Compliance with applicable laws and regulations;
- The reliability of accounting records;
- Business sustainability under normal as well as adverse conditions; and
- Responsible behaviour towards all stakeholders.

The efficiency of any internal control system is dependent on the strict observance of prescribed measures. There is always a risk of non-compliance with such measures by staff. Whilst no system of internal control can provide absolute assurance against misstatement or losses, the Bank's system is designed to provide the Board with reasonable assurance that the procedures in place are operating effectively. The Board assessed the internal control systems throughout the financial year and is of the opinion that they met accepted criteria. The Board monitors risk and internal control effectiveness through the BARCC and BCC.

22. SERIOUS PREJUDICIAL MATTERS

In the opinion of the directors, there are no serious prejudicial matters that can affect the Bank.

23. WELFARE OF EMPLOYEES

Relationship between management and employees

The relationship between employees and management continued to be good. Complaints are resolved through meetings and discussions. Work morale continues to be good and there were no unresolved complaints from employees. There was good teamwork between management and staff.

The Bank is an equal opportunity employer. It gives equal access to employment opportunities and ensures that the best available person is appointed to any given position free from discrimination of any kind and without regard to factors like gender, marital status, tribe, religion, and disability which does not impair one's ability to discharge duties.

Training

During the year, the Bank spent TZS 33.00 million on training of staff (2019: TZS 172.39 million). Training programs have been and are continually being developed to ensure employees are adequately trained at all levels. Employees received training to upgrade their skills and enhance their performance.

Staff loans and advances

The Bank provides loans to staff as well as salary advances to enable them meet financial needs and promote their economic development. Staff loans and advances are based on specific terms and conditions approved by the Board.

Medical facilities

The Bank covers medical bills for all of its employees and their immediate family dependents as well as medical insurance coverage to all staff.

Retirement benefits

The Bank makes statutory contributions in respect of staff social security benefits. The Bank's obligations in respect of these contributions are limited to 10% of the employee's gross salary.

MKOMBOZI COMMERCIAL BANK PLC

**REPORT OF THE DIRECTORS (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2020**

24. GENDER PARITY

The Bank is an equal opportunity employer and maintains reasonable gender balance among its employees. The Bank had the following employees by gender:

Gender	2020	2019
Female	71	74
Male	93	95
Total	164	169

25. POLITICAL DONATIONS

The Bank did not make any political donations during the year (2019: Nil).

26. RELATIONSHIP WITH STAKEHOLDERS

The Bank continued to maintain cordial relationships with stakeholders including the regulators.

27. CORPORATE SOCIAL RESPONSIBILITY (CSR) AND CHARITABLE DONATIONS

The Bank participates actively in community activities and development programs throughout the country. Charitable donations made during the year amounted to TZS 7.01 million (2019: TZS 22.47 million). The Bank made donations to various institutions including orphanage centres as education support for orphans.

28. AUDITOR

Ernst & Young was the auditor of the Bank for the year ended 31 December 2020. A resolution proposing the appointment of the external auditor of the Bank for the year ending 31 December 2021 was done by the shareholders in the Tenth Annual General Meeting which resolved that Ernst & Young will be the auditor of the Bank for a period of three years from 2019 to 2021.

The Directors' Report was approved by the Board of Directors on 31/03/ 2021 and signed on behalf of the Board per the resolution of the Board by:

Prof. Marcellina Mvula Chijoriga
Chairperson of the Board

Ms. Uphoo Swai
Board Member and Chairperson of the BAC

MKOMBOZI COMMERCIAL BANK PLC

STATEMENT OF DIRECTORS' RESPONSIBILITIES FOR THE YEAR ENDED 31 DECEMBER 2020

The directors are required by the Companies Act, 2002 and Banking and Financial Institutions Act, 2006 of Tanzania to prepare financial statements for each financial period that present fairly, in all material respects, the state of financial affairs of the Bank as at the end of the financial year and of the profit or loss for the year. The directors are also obliged to ensure that the Bank keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Bank. They are also responsible for safeguarding the assets of the Bank.

The directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgements and estimates, in conformity with International Financial Reporting Standards (IFRS) and the requirements of the Companies Act, 2002 and Banking and Financial Institutions Act, 2006 of Tanzania. The directors are of the opinion that the financial statements present fairly, in all material respects, the state of the financial affairs of the Bank, and of their financial results in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Companies Act, 2002 and Banking and Financial Institutions Act, 2006 of Tanzania. The directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the financial statements, as well as designing, implementing and maintaining internal control relevant to the preparation and fair presentation of the statements that are free from material misstatement.

The Bank's directors have made an assessment of the Bank's ability to continue as a going concern for the foreseeable future. Despite the Bank incurring a loss during the year and being undercapitalized as at year-end, the financial statements are prepared on the basis of a going concern. This basis presumes that the Bank's business and capital restoration plans will be successfully implemented to the extent that the Bank's capital position will be restored to the level required by the regulations, the Bank will have access to sufficient resources necessary to enable it to continue in business for the foreseeable future, and that realisation of assets and discharge of liabilities will occur in the normal course of business.

The financial statements were approved by the Board of Directors on 31/03/ 2021 and were signed on its behalf by:

Marcellina Mvula Chijoriga
Member of the Board

Jphoo Swai
Member and Chairperson of the BAC

MKOMBOZI COMMERCIAL BANK PLC

DECLARATION BY THE HEAD OF FINANCE FOR THE YEAR ENDED 31 DECEMBER 2020

The National Board of Accountants and Auditors (NBAA) according to the power conferred to it under the Auditors and Accountants (Registration) Act No. 33 of 1972, as amended by Act No. 2 of 1995, requires financial statements to be accompanied with a declaration issued by the Head of Finance responsible for the preparation of the financial statements of the entity concerned.

It is the duty of a Professional Accountant to assist the Board of Directors to discharge the responsibility of preparing financial statements of an entity showing a true and fair view of the entity's financial position and performance in accordance with International Financial Reporting Standards and the requirements of the Companies Act, 2002 and Banking and Financial Institutions Act, 2006 of Tanzania. Full legal responsibility for the preparation of financial statements rests with the Board of Directors as stated under the Statement of Directors' Responsibilities on the previous page.

I, **Dennis Frank Kejo**, being the Chief Finance Officer of Mkombozi Commercial Bank Plc hereby acknowledge my responsibility of ensuring that the financial statements for the year ended 31 December 2020 have been prepared in compliance with International Financial Reporting Standards and the requirements of the Companies Act, 2002 and the Banking and Financial Institutions Act, 2006 of Tanzania.

I thus confirm that the financial statements give a true and fair view of the financial position and results of Mkombozi Commercial Bank Plc as on that date and for the year then ended, and that the financial statements have been prepared based on properly maintained financial records.

INDEPENDENT AUDITOR'S REPORT

To the shareholders of Mkombozi Commercial Bank Public Limited Company

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the financial statements of Mkombozi Commercial Bank Public Limited Company (the "Bank") set out on pages 21 to 81, which comprise the statement of financial position as at 31 December 2020, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at 31 December 2020, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) and the requirements of the Companies Act, 2002 and the Banking and Financial Institutions Act, 2006 of Tanzania.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Tanzania, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 2.2 to the financial statements, which indicates that the Bank's core capital, core capital ratio and total capital ratio were TZS 16,423 million (2019: TZS 8,606 million) equivalent to 11.08% and 11.08% respectively (2019: 5.76% and 5.76%). Whilst the absolute core capital was above the regulatory benchmark of TZS 15,000 million, however, the core and total capital ratios were below regulatory limits of 12.5% and 14.5% respectively. As stated in Note 2.2, these events or conditions, along with other matters as set forth in Note 2.2, indicate that a material uncertainty exists that may cast significant doubt on the Bank's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Material Uncertainty Related to Going Concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report. For each matter below, our description of how our audit addressed the matter is provided in that context.

Building a better

INDEPENDENT AUDITOR'S REPORT (Continued)

To the shareholders of Mkombozi Commercial Bank Public Limited Company

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

Key Audit Matters (Continued)

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provided the basis for our audit opinion on the accompanying financial statements.

No.	Key audit matter	How our audit addressed the key audit matter
1.	Credit risk and expected credit losses on loans and advances to customers The IFRS 9 Expected Credit Losses (ECLs) approach is applicable to loans advances to customers. ECLs represent management's best estimate of the losses expected to be incurred at the reporting date. The ECL allowances are significant in the context of the financial statements due to their magnitude as well as the estimation uncertainty and significant level of judgement inherent in determining the amount of the allowances. The models used to determine the ECL estimates include inputs from multiple sources. Management applies adjustments to the model outputs to cater for factors not included in the model assessment, which can be highly subjective. As at 31 December 2020, the ECL allowances on loans and advances to customers were TZS 4,848 million (2019: TZS 9,308 million). There is a risk that the ECL allowances do not represent a complete and accurate estimate of ECLs and that the carrying amount of these items is misstated. This includes the risk that the ECL model is not in compliance with IFRS 9. The disclosures in Notes 4, 5, 6 and 21 relating to credit risk and ECL allowances are also significant to the financial statements.	Our audit procedures included, but were not limited to the following: • Evaluating the Bank's ECL model against the IFRS 9 requirements. • Comparing the Bank's inputs into the ECL model to industry, financial and economic data and our own assessment. As part of this, we assessed the Bank's inputs used including the consistency of judgement applied in the classification of loans and advances and determination of probabilities of default. • Testing that the reported ECL allowances were determined in accordance with the Bank's ECL model. • Evaluating the completeness of the disclosures on ECL allowances on loans and advances to customers.

INDEPENDENT AUDITOR'S REPORT (Continued)

To the shareholders of Mkombozi Commercial Bank Public Limited Company

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

Key Audit Matters (Continued)

No.	Key audit matter	How our audit addressed the key audit matter
2.	Compliance with capital adequacy requirements Operating in the banking sector presents increased regulatory and financial risks due to the need to comply with banking laws and regulations. As at 31 December 2020, the Bank's core capital, core capital ratio and total capital ratio were TZS 16,423 million (2019: TZS 8,606 million: equivalent to 11.08% and 11.08% (2019: 5.76% and 5.76%). Whilst the absolute core capital was within regulatory benchmark of TZS 15,000 million, however, the core and total capital adequacy ratios were below the regulatory limits of 12.5% and 14.5% respectively. We focused on compliance by the Bank with the capital adequacy requirements stipulated in the Banking and Financial Institutions laws and regulations because breaches of compliance could have a significant effect on the results and financial position of the Bank. Furthermore, the Banking and Financial Institutions (External Auditors) Regulations, 2014 require auditors to report specifically on the accuracy of the computation of the reported capital position. We also considered there to be a risk that the disclosures on capital adequacy in Note 5.5 which are significant to the understanding of the Bank's capital position are not accurate and complete.	Our audit procedures included, but were not limited to: • Understanding the Bank's process for calculating the capital position. • Inspecting the Banking and Financial Institutions Act and relevant regulations and the related Bank of Tanzania pronouncements for changes in relevant regulations and prudential guidelines and checking that the capital position was computed in accordance with the applicable regulations and prudential guidelines. • Evaluating the arithmetic correctness of the capital position calculations through re-computation. • Understanding the Bank's plans to ensure compliance with the regulatory capital requirements. • Evaluating whether the Bank's disclosures on capital adequacy were accurate and complete.

INDEPENDENT AUDITOR'S REPORT (Continued)

To the shareholders of Mkombozi Commercial Bank Public Limited Company

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

Key Audit Matters (Continued)

No.	Key audit matter	How our audit addressed the key audit matter
3.	Interest income determination The Bank's shares are listed on the Dar es Salaam Stock Exchange. The key users of the financial statements, including shareholders, expect the Bank to be profitable and pay dividends. We considered there to be a risk that interest income on loans and advances to customers is inappropriately reported to achieve desired financial results. Moreover, the Bank's core banking system is not configured to automatically calculate interest income using the effective interest method. Determination of interest income on loans and advances to customers using the effective interest method is done manually using excel spreadsheets. There is a risk that interest income on loans and advances to customers is overstated by recognizing unearned interest, for example, by recognizing interest income using the straight-line method rather than the effective interest method. We also considered that interest income on loans and advances to customers and the related disclosures in Note 8 are adequate to the Bank's financial statements.	We considered revenue recognition as a high audit risk area and undertook procedures to respond to this risk. Our audit procedures included, but were not limited to: • Understanding the Bank's process for recognizing interest income including set-up of accounts for loans and advances to customers, pricing data, segregation of duties, and calculation of interest income. • Testing that the interest rates used in the determination of interest income agreed to the contractual effective interest rates for a sample of loans and advances to customers. • Re-computing interest income on loans and advances to customers on a sample basis and checking that the results of our re-computation agreed to the management calculations. • Assessing the adequacy of the Bank's disclosures on interest income.

Other Information

The directors are responsible for the other information. Other information consists of the information included in the Bank Information, Directors' Report, Statement of Directors' Responsibilities and the Declaration by the Head of Finance, which we obtained prior to the date of this report, and the Annual Report, which is expected to be made available to us after that date. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

INDEPENDENT AUDITOR'S REPORT (Continued)

To the shareholders of Mkombozi Commercial Bank Public Limited Company

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act, 2002 and the Banking and Financial Institutions Act, 2006 of Tanzania, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for overseeing the Bank's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.

Building a better
working world

INDEPENDENT AUDITOR'S REPORT (Continued)

To the shareholders of Mkombozi Commercial Bank Public Limited Company

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

Auditor's Responsibilities for the Audit of the Financial Statements (Continued)

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

This report, including the opinion, has been prepared for, and only for, the Bank's members as a body in accordance with the Companies Act, 2002 of Tanzania and for no other purposes.

As required by the Companies Act, 2002 of Tanzania, we report to you, based on our audit, that:

- We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit;
- In our opinion, proper books of account have been kept by the Bank, so far as appears from our examination of those books;
- The Directors' Report is consistent with the financial statements;

Building a better
working world

INDEPENDENT AUDITOR'S REPORT (Continued)

To the shareholders of Mkombozi Commercial Bank Public Limited Company

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS (CONTINUED)

- Information specified by law regarding directors' remuneration and transactions with the Bank is disclosed; and,
- The Bank's statement of financial position and statement of profit or loss and other comprehensive income are in agreement with the books of account.

As required by the Banking and Financial Institutions (External Auditors) Regulations, 2014 of Tanzania, we report to you, based on our audit, that:

- In our opinion, the capital adequacy ratios as presented in Note 5.5 to the financial statements have been computed in accordance with the Banking and Financial Institutions Act, 2006, and the Banking and Financial Institutions (Capital Adequacy) Regulations, 2014 of Tanzania and the related Bank of Tanzania pronouncements.

As at 31 December 2020, the Bank's core capital, core capital and core capital ratio and total capital ratio were TZS 16,423 million (2019: TZS 8,606 million); equivalent to 11.08% and 11.08% (2019: 5.76% and 5.76%). Whilst the absolute core capital was within regulatory benchmark of TZS 15,000 million, however, the core and total capital adequacy ratios were below the regulatory limits of 12.5% and 14.5% respectively.

The engagement partner on the audit resulting in this independent auditor's report is Joseph Sheffu.

MKOMBOZI COMMERCIAL BANK PLC

NOTES TO THE FINANCIAL STATEMENTS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

1. GENERAL INFORMATION

Mkombozi Commercial Bank Public Limited Company (the “Bank” or “Mkombozi Commercial Bank Plc”) is a public limited liability company incorporated and domiciled in the United Republic of Tanzania. The Bank’s shares are listed and traded on the Dar es Salaam Stock Exchange (DSE). The address of the Bank’s registered office is as follows:

Mkombozi Commercial Bank Plc
Plot No. 40, Mansfield Street
Behind St. Joseph Cathedral
P.O. Box 38448
Dar es Salaam, Tanzania

Further information about the Bank is presented under the Bank Information and the Bank’s activities are presented in the Directors’ Report.

The financial statements were approved for issue by the Board of Directors as indicated under the statement of financial position.

2. BASIS OF PREPARATION

2.1 Statement of compliance and basis of preparation

The Bank’s financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the requirements of the Banking and Financial Institutions Act, 2006 and Companies Act, 2002 of Tanzania.

The measurement basis applied in the preparation of the financial statements is the historical cost basis, except where otherwise stated in the accounting policies. The financial statements are presented in Tanzania shillings (TZS) and the amounts are rounded to the nearest thousand (TZS’000), except where otherwise indicated.

For purposes of reporting under the requirements of the Companies Act, 2002 and Banking and Financial Institutions Act, 2006 of Tanzania, the balance sheet in these financial statements is represented by the statement of financial position, and the profit and loss account is represented by the statement of profit or loss and other comprehensive income.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Bank’s management and directors to exercise judgment in the process of applying the Bank’s accounting policies. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions change. The directors believe that the underlying assumptions are appropriate and that the Bank’s financial statements therefore present the financial position and results fairly. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 6.

2.2 Going concern.

The Bank’s core capital, core capital ratio and total capital ratio were TZS 16,508 million (2019: TZS 8,606 million) equivalent to 11.13% and 11.13% (2019: 5.76% and 5.76%). Whilst the absolute core capital was within regulatory benchmark of TZS 15,000 million, however, the core and total capital adequacy ratios were below the regulatory requirements of 12.5% and 14.5% respectively. During the year the Bank had embarked on capital restoration plan which consisted of internal business turnaround (remediation of the non-performing loan and retention of profits) and raising of fresh capital through Rights Issue.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020**

2. BASIS OF PREPARATION (CONTINUED)

2.2 Going concern (Continued)

The outcome of the Rights Issue constitutes post events to this report where TZS 2.20billion was raised as additional capital. This enhances absolute core capital to TZS 18,587 million and improves adequacy ratios to 12.78% both core and total capital. The Bank continues to implement additional corrective measures such as write off of the Non-Performing Loan and proactive management of the balance sheet in order to restore the capital adequacy ratios within regulatory requirement.

The Bank's management and directors have made an assessment of the Bank's ability to continue as a going concern for the foreseeable future. The financial statements are prepared on the basis of a going concern.

- The Bank's liquidity position is expected to be reasonably sufficient to meet the maturing obligations and other business requirements. The Bank has not had significant negative impact on liquidity so far arising from the Covid-19 pandemic mainly because of the nature and structure of the Bank's liabilities and the liquidity investment portfolio base. This is expected to continue for the foreseeable future. The Bank's management and directors will continue to take necessary mitigations including close monitoring of key liquidity metrics, liquidity outflows, close and tight management of positions and intraday flows, slowing down/prioritizing lending in order to minimize the risk of default and liquidity distress, and managing the loan portfolio closely in order to take necessary performance remedial actions timely.

The Bank's core and total capital positions are dependent on a number of factors including financial results and raising of additional equity and the level of risk weighted assets. The directors and management expect to improve these factors in the foreseeable future. The shareholders, directors and management are committed to ensuring that the capital restoration plan disclosed in Note 5.5 is executed as quickly as possible in order to return the Bank to regulatory capital compliance, profitability, and sustainable growth.

3. CHANGES IN ACCOUNTING POLICIES

3.1 New and amended standards and interpretations effective during the year

The following standards have been adopted by the Bank for the first time for the financial year beginning in 1 January 2020:

Standard or amendment	Key requirement
Amendments to IAS 1 and IAS 8	The IASB has made amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors which use a consistent definition of materiality throughout International Financial Reporting Standards and the Conceptual Framework for Financial Reporting, clarify when information is material and incorporate some of the guidance in IAS 1 about immaterial information.
In particular, the amendments clarify:	
▪ that the reference to obscuring information addresses situations in which the effect is similar to omitting or misstating that information, and that an entity assesses materiality in the context of the financial statements as a whole, and ▪ the meaning of 'primary users of general-purpose financial statements' to whom those financial statements are directed, by defining them as 'existing and potential investors, lenders and other creditors' that must rely on general purpose financial statements for much of the financial information they need.	

The amendment had no impact on the financial statements of the Bank.

3. CHANGES IN ACCOUNTING POLICIES

3.1 New and amended standards and interpretations effective during the year

The following standards have been adopted by the Bank for the first time for the financial year beginning in 1 January 2020:

Standard or amendment	Key requirement
Definition of a Business – Amendments to IFRS 3	The amended definition of a business requires an acquisition to include an input and a substantive process that together significantly contribute to the ability to create outputs. The definition of the term ‘outputs’ is amended to focus on goods and services provided to customers, generating investment income and other income, and it excludes returns in the form of lower costs and other economic benefits. The amendments will likely result in more acquisitions being accounted for as asset acquisitions. The amendment had no impact on the financial statements of the Bank.
Interest Rate Benchmark Reform – Amendments to IFRS 7, IFRS 9 and IAS 39	The amendments made to IFRS 7 Financial Instruments: Disclosures, IFRS 9 Financial Instruments and IAS 39 Financial Instruments: Recognition and Measurement provide certain reliefs in relation to interest rate benchmark reforms. The reliefs relate to hedge accounting and have the effect that the reforms should not generally cause hedge accounting to terminate. However, any hedge ineffectiveness should continue to be recorded in the income statement. Given the pervasive nature of hedges involving LIBOR-based contracts, the reliefs will affect companies in all industries. The Bank does not have hedging accounting therefore adoption of the amendments did not have an impact to their financial statements.
Revised Conceptual Framework for Financial Reporting	The IASB has issued a revised Conceptual Framework which will be used in standard-setting decisions with immediate effect. Key changes include: • increasing the prominence of stewardship in the objective of financial reporting • reinstating prudence as a component of neutrality • defining a reporting entity, which may be a legal entity, or a portion of an entity
Covid-19-related Rent Concessions – Amendments to IFRS 16	The revision had no impact on the financial statements of the Bank. As a result of the COVID-19 pandemic, rent concessions have been granted to lessees. Such concessions might take a variety of forms, including payment holidays and deferral of lease payments. In May 2020, the IASB made an amendment to IFRS 16 Leases which provides lessees with an option to treat qualifying rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in accounting for the concessions as variable lease payments in the period in which they are granted. Entities applying the practical expedients must disclose this fact, whether the expedient has been applied to all qualifying rent concessions or, if not, information about the nature of the contracts to which it has been applied, as well as the amount recognised in profit or loss arising from the rent concessions.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

3. CHANGES IN ACCOUNTING POLICIES (CONTINUED)

3.2 New and amended standards and interpretations issued but not yet effective

Standard or amendment	Key requirement	Effective Date
IFRS 17 Insurance Contracts	- This is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 - Insurance Contracts that was issued in 2005. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of IFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies, IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The Bank is still assessing the impact of amendments to IFRS 17.	1 January 2023
Onerous Contracts – Cost of Fulfilling a Contract Amendments to IAS 37	The amendment to IAS 37 clarifies that the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling the contracts. Before recognising a separate provision for an onerous contract, the entity recognises any impairment loss that has occurred on assets used in fulfilling the contract.	1 January 2022
Classification of Liabilities as Current or Non-current – Amendments to IAS 1	The narrow-scope amendments to IAS 1 Presentation of Financial Statements clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the expectations of the entity or events after the reporting date (eg the receipt of a waiver or a breach of covenant). The amendments also clarify what IAS 1 means when it refers to the ‘settlement’ of a liability. The amendments could affect the classification of liabilities, particularly for entities that previously considered management’s intentions to determine classification and for some liabilities that can be converted into equity. They must be applied retrospectively in accordance with the normal requirements in IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors.	1 January 2023
Property, Plant and Equipment: Proceeds before intended use – Amendments to IAS 16	The amendment to IAS 16 Property, Plant and Equipment (PP&E) prohibits an entity from deducting from the cost of an item of PP&E any proceeds received from selling items produced while the entity is preparing the asset for its intended use. It also clarifies that an entity is ‘testing whether the asset is functioning properly’ when it assesses the technical and physical performance of the asset. The financial performance of the asset is not relevant to this assessment. Entities must disclose separately the amounts of proceeds and costs relating to items produced that are not an output of the entity’s ordinary activities.	1 January 2022

MKOMBOZI COMMERCIAL BANK PLC

NOTES TO THE FINANCIAL STATEMENTS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

3. CHANGES IN ACCOUNTING POLICIES (CONTINUED)

3.2 New and amended standards and interpretations issued but not yet effective (Continued)

Standard or amendment	Key requirement	Effective Date
Reference to the Conceptual Framework – Amendments to IFRS 3	Minor amendments were made to IFRS 3 Business Combinations to update the references to the Conceptual Framework for Financial Reporting and add an exception for the recognition of liabilities and contingent liabilities within the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets and Interpretation 21 Levies. The amendments also confirm that contingent assets should not be recognised at the acquisition date.	1 January 2022
AIP IFRS 1 First-time Adoption of International Financial Reporting Standards – Subsidiary as a first-time adopter	Subsidiary as a first-time adopter - The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent's date of transition to IFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16 (a) of IFRS 1. - An entity applies the amendment for annual reporting periods beginning on or after 1 January 2022. Earlier application is permitted.	1 Jan 2022
AIP IFRS 9 Financial Instruments – Fees in the '10 per cent' test for derecognition of financial liabilities	Fees in the '10 per cent' test for derecognition of financial liabilities - The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. There is no similar amendment proposed for IAS 39. - An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment. - An entity applies the amendment for annual reporting periods beginning on or after 1 January 2022. Earlier application is permitted.	1 Jan 2022
AIP IAS 41 Agriculture – Taxation in fair value measurements	Taxation in fair value measurements - The amendment removes the requirement in paragraph 22 of IAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of IAS 41. - An entity applies the amendment to fair value measurements on or after the beginning of the first annual reporting period beginning on or after 1 January 2022. Earlier application is permitted.	1 Jan 2022

There are no other standards that are not yet effective and that would be expected to have a material impact on the Bank in the current or future reporting periods and on foreseeable future transactions.

For all new standards and interpretations not yet adopted by the Bank, will be adopted on the respective effective dates.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated.

(a) Interest income and expense

For all interest-bearing instruments measured at amortized cost, interest income and expenses are recognized in profit or loss using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the gross carrying amount of the financial asset or financial liability.

The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

The Bank calculates interest income on financial assets, other than those considered credit-impaired, by applying the EIR to the gross carrying amount of the financial asset. When a financial asset becomes credit-impaired and is, therefore, regarded as 'Stage 3', the Bank calculates interest income by applying the EIR to the net amortised cost of the financial asset. If the financial asset cures and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

(b) Other revenue and income

Revenue from contracts with customers is measured based on the consideration specified in a contract with a customer and excludes amounts on behalf of third parties. The Bank recognises the revenue from contracts with customers when it transfers control over to the customers. Revenue from contracts with customers is presented in "fee and commission income".

Consulting, administration and similar service fees

Fee income received by the Bank for administration, consulting and similar services is recognised as revenue as the service is provided. The service is billed and the cash is received on a monthly basis.

Deposit-related fees and commissions

Banking fees such as bundled service fees, transactional fees and account management fees are recognised over the period over which the underlying service is provided to the customer. Transactional fees such as cash withdrawal fees, deposit fees, debit order fees etc. are recognised at the point in time of transactions with customers and payment is received monthly. The performance obligation on bundled services is satisfied on a monthly basis.

Commitment fees

Commitment fees relate to loan commitments where it is not probable that the loan will be drawn. Such fees are regarded as a return for the provision of a service and are amortised over the commitment period. These fees may be received upfront or on a monthly basis.

(c) Provisions

A provision is recognized if, as a result of a past event, the Bank has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(d) Foreign currency translation

Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”) which is TZS. The financial statements are presented in TZS.

Transactions and balances

Transactions in foreign currencies during the year are converted to TZS using the exchange rates prevailing at the dates of the transactions. Monetary items denominated in foreign currency are translated with the closing rate as at the reporting date. Non-monetary items measured at historical cost denominated in a foreign currency are translated with the exchange rate as at the date of initial recognition; non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

(e) Financial instruments

The Bank classifies the financial instruments into classes that reflect the nature of information and take into account the characteristics of those financial instruments. The classification made can be seen in the following table:

Category (As defined by IFRS 9)	Class (as determined by the Bank)	
Financial assets	Loans and advances to other banks	
	Cash in hand	
	Balances with BoT	
	Loans and advances to customers	Loans to individuals Loans to commercial entities Loans to salaried employees
	Investments in debt instruments	Advances to staff Government securities Corporate bonds
	Other assets	Sundry debtors Imprest accounts
	Fair value through other comprehensive income (FVOCI)	Equity investments designated at FVOCI
Financial liabilities	Financial liabilities at amortised cost	Deposits due to other banks Other liabilities
		Deposits due to customers
		Demand deposits Time deposits

Undrawn loan commitments

The Bank issues loan commitments. Undrawn loan commitments are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. The nominal contractual value of the undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded in the statement of financial position. However, since the commitments are under the scope of IFRS 9, if material, ECL amounts are recognized in the statement of financial position within provisions and the movement in the provision is recognized in profit or loss.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Financial assets

The Bank uses trade date accounting for regular way contracts when recording financial asset transactions. The classification and subsequent measurement of financial assets depends on:

- i) The Bank's business model for managing the asset; and,
- ii) The cash flow characteristics of the asset.

The business model reflects how the Bank manages the assets in order to generate cash flows. That is, whether the Bank's objective is solely to collect the contractual cash flows from the assets or to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of 'other' business model and measured at FVPL. Factors considered by the Bank in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers are compensated.

SPPI: Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Bank assesses whether the financial instruments' cash flows represent solely payments of principal and interest (the 'SPPI test'). In making this assessment, the Bank considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Based on these factors, the Bank classifies its financial assets into one of the following measurement categories.

- **Amortized cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest ('SPPI'), and that are not designated at FVPL, are measured at amortized cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognized and measured. Interest income from these financial assets is included in 'Interest and similar income' using the effective interest rate method.
- **Fair value through profit or loss (FVPL):** Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognized in profit or loss and presented in profit or loss within 'Other income' in the period in which it arises.
- **Fair value through other comprehensive income (FVOCI) with recycling:** Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent solely payments of principal and interest and are not designated at FVPL, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in 'Other income'

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Financial assets (Continued)

- **Equity instruments:** Equity instruments are instruments that meet the definition of equity from the issuer's perspective, that is, instruments that do not contain a contractual obligation to pay cash and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include basic ordinary shares. The Bank subsequently measures all investments in equity instruments at fair value through profit or loss, except where the Bank's management has elected, at initial recognition, to irrevocably designate an equity investment at fair value through other comprehensive income. The Bank's policy is to designate equity investments as FVOCI when those investments are held for purposes other than to generate investment returns. When this election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Dividends, when representing a return on such investments, continue to be recognised in profit or loss as other income when the Bank's right to receive payments is established.

Securities held for trading are held principally for the purpose of selling in the near term or are part of a portfolio of financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. These securities are classified in the 'other' business model and measured at FVPL.

The Bank reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the period.

De-recognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when the rights to receive cash flows from the financial asset have expired. The Bank also derecognizes the financial asset if it has both transferred the financial asset and the transfer qualifies for de-recognition. The Bank has transferred the financial asset if, and only if, either:

- The Bank has transferred its contractual rights to receive cash flows from the financial asset; or
- It retains the rights to the cash flows but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement.

Pass-through arrangements are transactions whereby the Bank retains the contractual rights to receive the cash flows of a financial asset, but assumes a contractual obligation to pay those cash flows to one or more entities, when all the following conditions have been met:

- The Bank has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates.
- The Bank cannot sell or pledge the original asset other than as security to the eventual recipients.
- The Bank has to remit any cash flows it collects on behalf of the eventual recipients without material delay. In addition, the Bank is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

A transfer only qualifies for de-recognition if either:

The Bank has transferred substantially all the risks and rewards of the asset; or
The Bank has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Financial assets (Continued)

Modification of financial assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. The Bank renegotiates loans to customers in financial difficulty to maximize collection and minimize the risk of default.

If the terms are substantially different, the Bank derecognizes the original financial asset and recognizes a 'new' asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Bank also assesses whether the new financial asset recognized is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the debtor being unable to make the originally agreed payments. A loan will remain at its original stage until it meets the criteria of cure.

The risk of default of such assets after modification is assessed at the reporting date and compared with the risk under the original terms at initial recognition. The Bank monitors the subsequent performance of modified assets until they are completely and ultimately derecognized. The Bank may determine that the credit risk has significantly improved after modification, so that the assets are moved from Stage 3 or Stage 2 (Lifetime ECL) to Stage 1 (12-month ECL). This is only the case for assets which have performed in accordance with the new terms. Differences in the carrying amount are recognized in profit or loss as a gain or loss on de-recognition.

If the terms are not substantially different, the renegotiation or modification does not result in de-recognition, and the Bank recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognizes a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Bank monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

Impairment of financial assets

The Bank records the allowance for expected credit losses on loans and other debt financial assets not held at FVPL. Equity instruments are not subject to impairment under IFRS 9.

ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit losses or LTECL) unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit losses (12-month ECL).

The 12-month ECL allowance is a portion of LTECL that results from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECL and 12 months' ECL are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Financial assets (Continued)

Impairment of financial assets (Continued)

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. Based on this process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described below:

Stage 1: When loans are first recognised, the Bank recognises an allowance based on 12 months expected credit losses. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.

Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the lifetime expected credit losses. Stage 2 loans also include facilities, where the credit risk has improved, and the loan has been reclassified from Stage 3.

Stage 3: Loans considered credit-impaired. The Bank records an allowance for the lifetime expected credit losses.

POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. The ECL allowance is only recognised or released to the extent that there is a subsequent change in the ECL.

Calculation of Expected Credit Losses

The Bank calculates expected credit losses based on probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the effective interest rate. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive. The mechanics of the expected credit losses calculations are outlined below and the key elements are, as follows:

Probability of Default (PD): The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio.

The Exposure at Default (EAD): Is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.

Loss Given Default (LGD): Is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the exposure at default.

Impairment losses and releases are accounted for and disclosed separately from modification losses or gains that are accounted for as an adjustment of the financial asset's gross carrying amount.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Financial assets (Continued)

*Impairment of financial assets (Continued)**Calculation of Expected Credit Losses (Continued)*

The mechanics of the Expected Credit Losses method are summarised below:

Stage 1: The 12-month expected credit loss is calculated as the portion of life time expected credit losses that represent the expected credit losses that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12-month expected credit loss allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original effective interest rate (EIR).

Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the life time expected credit losses. The mechanics are similar to those explained above, including the use of multiple scenarios, but PD and LGD are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.

Stage 3: For loans considered credit-impaired, the Bank recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

Loan commitments: When estimating lifetime expected losses for undrawn loan commitments, the Bank estimates the expected portion of the loan commitment that will be drawn down over its expected life. The expected credit losses is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the four scenarios. The expected cash shortfalls are discounted at an approximation to the expected effective interest rate on the loan. The calculation of expected credit losses, including the estimation of the expected period of exposure and discount rate is made, on an individual basis for corporate and on a collective basis for retail loans products. The collective assessments are made separately for portfolios of facilities with similar credit risk characteristics.

Forward looking information: In the expected credit losses models, the Bank relies on a broad range of forward-looking, information as economic inputs. The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

Definition of default: IFRS 9 does not define default but requires the definition to be consistent with the definition used for internal credit risk management purposes. However, IFRS 9 contains a rebuttable presumption that default does not occur later than when a financial asset is 90 days past due. The Bank considers a default as and when a financial asset is past due for more than 90 days or the qualitative criterion by which the financial institution considers that the obligor is unlikely to pay its credit obligations in full, without recourse to actions such as realizing security. The analysis in this model is based on the consideration that any loans past due for more than 30 days or degraded 3 notches from the rating at initial recognition is an indication of increase in credit risk and subject to staging as per IFRS 9 requirements. The Bank also considers the following events: Significant financial difficulty of the borrower or issuer; A breach of contract such as a default or past due event; The lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider; The disappearance of an active market for a security because of financial difficulties; or, The purchase of a financial asset at a deep discount that reflects the incurred credit losses. It may not be possible to identify a single discrete event—instead, the combined effect of several events may have caused financial assets to become credit-impaired. The Bank assesses whether debt instruments measured at amortised cost or FVOCI are credit-impaired at each reporting date.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Financial assets (Continued)

Impairment of financial assets (Continued)

Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position. However, the fair value of collateral affects the calculation of expected credit losses. It is generally assessed, at a minimum, at inception and re-assessed on at least every three years. To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as recognized property valuers.

Collateral repossessed

The Bank's policy is to sell the repossessed collateral and the proceeds obtained used to recover the loan outstanding. In its normal course of business, the Bank does not physically repossess properties or other assets in its retail portfolio, but engages external agents to recover funds, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the properties under legal repossession processes are not recorded on the statement of financial position.

Write off of financial assets

Financial assets are written off either partially or in their entirety only when the Bank has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to the ECL expense.

The Bank may write off financial assets in whole or in part, when it has exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include: (i) ceasing enforcement activity; and (ii) where the Bank's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full or there is no reasonable expectation of completing the recovery process because of litigation proceedings by the borrowers. The Bank generally considers that there is no reasonable expectation of recovering non-performing financial assets that have been in loss category for more than four (4) consecutive quarters. The assessment is done per specific borrower.

Judgements and estimates applied in determining ECL

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The Bank's expected credit losses calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the expected credit losses models that are considered accounting judgements and estimates include:

- The Bank's internal credit grading model, which assigns PDs to the individual grades
- The Bank's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a Lifetime expected credit losses basis and the qualitative assessment
- The segmentation of financial assets when their ECLs are assessed on a collective basis.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Financial assets (Continued)

Impairment of financial assets (Continued)

Cure of non-performing financial assets including restructured loans

An instrument is considered to no longer be SICR or in default (i.e. to have cured) when it has been established that the obligor is able to meet the requirements of the agreed terms and conditions. IFRS 9 allows credit exposures to migrate from higher credit risk categories to lower credit risk categories, that is, from Stage 3 to Stage 2 and from Stage 2 to Stage 1.

Under migration from Stage 3 to Stage 2, the Bank considers criteria for upgrade of credit accommodations, whereby the obligor has timely paid three consecutive instalments. These periods have been determined based on an analysis which considers the likelihood of a financial instrument returning to default status after cure using different possible cure definitions. The Bank has not used the low credit risk exemption for any financial instruments in the current year.

On the other hand, credit exposures may migrate from Stage 2 to Stage 1 when there is a significant improvement of the credit exposure. In determining whether an exposure should shift backward from Stage 2 to Stage 1, the Bank considers the following:

- All outstanding payments on the credit facility are made on time and there are no payments in arrears.
- Improvement of the quantitative and qualitative factors that caused significant increase of the credit risk.

For credit exposures that have cured, that is, shifted from Stage 2 to Stage 1, interest income is calculated on carrying amount of the asset at the beginning of the period before allowance for ECLs using the effective interest rate. The carrying amount of the exposure is determined as the amortized cost at the end of the period less the allowance for ECL computed.

For credit exposures that have shifted from Stage 3 to Stage 2, objective evidence of impairment still exists and accordingly interest income is computed on the carrying amount of the asset at the beginning of the period after allowance for ECLs using the effective interest rate. The carrying amount of the exposure is determined as the amortized cost at the end of the period less the allowance for ECL computed.

Financial liabilities

Financial liabilities are initially recognized at fair value plus transaction costs, except for financial liabilities recorded at fair value through profit or loss. Subsequent to initial recognition all financial liabilities other than derivatives are measured at amortized cost. Derivatives are initially recognized and subsequently measured at fair value. Financial liabilities measured at amortized cost are deposits and other liabilities.

De-recognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability. The difference between the carrying amount of the original financial liability and the consideration paid is recognised in profit or loss.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(e) Financial instruments (Continued)

Offsetting financial instruments

Where a currently enforceable legal right to offset exists for recognised financial assets and financial liabilities, and there is an intention to settle the liability and realise the asset simultaneously, or to settle on a net basis, all related financial effects are offset.

(f) Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise cash in hand and all cash equivalent items maturing within 90 days from the date of acquisition including non-restricted balances with BoT and loans and advances to other banks maturing within three months. Cash and cash equivalents exclude the statutory minimum reserve requirement held with BoT.

(g) Impairment of non-financial assets

At the end of each reporting period, the Bank reviews the carrying amount of its tangible and intangible assets to determine whether there is any indication that these assets have suffered an impairment loss. The carrying amounts of non-financial assets are reviewed for impairment when events or changes in circumstances indicate the carrying amount may not be recoverable. If any such indication exists, and where the carrying amounts exceed the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amount. The impairment losses are recognized in profit or loss.

In determining the recoverable amount, the Bank considers the higher of the fair value of the asset less costs to disposal, and value in use. In estimating value in use, the Bank is cognisant of the estimated future cash flows discounted to the present value using a pre-tax discount rate that is reflective of the current market assessment of time value of money and the risks specific to the asset itself. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by available fair value indicators.

Where impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but limited to the extent that, the increased carrying amount does not exceed the carrying amount that would have been determined, net of accumulated depreciation or amortisation, had no impairment loss been recognised. Such reversal is recognised in profit or loss.

(h) Determination of fair value

For financial instruments traded in active markets, the determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations. This includes listed equity securities and quoted debt instruments.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indicators that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions.

For all other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable data in respect of similar financial instruments, using models to estimate the present value of expected future cash flows or other valuation techniques, using inputs (for example, LIBOR yield curve, foreign exchange rates, volatilities and counterparty spreads) existing at the reporting date.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(i) Taxes

Income tax expense represents the net of current income tax expenses and deferred tax charges or credits.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in profit or loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Bank's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Current income tax relating to items recognised in OCI or directly in equity is recognised in OCI or equity, respectively, and not in profit or loss.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantially enacted at the end of the reporting period. Deferred income tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in profit or loss, other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(i) Taxes (Continued)

Value Added Tax (VAT)

The Bank pays VAT on all its taxable purchases during the course of operation (input tax). The Bank also collects VAT, that is, output VAT, on the fees and commissions charged on the financial services according to the prevailing laws and remits the amount to Tanzania Revenue Authority (TRA).

Revenues, expenses and assets are recognised net of the amount of VAT except where the VAT incurred on a purchase of assets or services is not recoverable from the TRA, in which case the VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and receivables and payables that are stated with the amount of VAT included.

The net amount of VAT recoverable from, or payable to, tax authorities is included as part of receivables or payables in the statement of financial position.

(j) Equity

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs. Share capital represents the aggregate of the paid-up and called-up amounts of shares issued. Share premium represents the excess of the amounts received on the issue of shares over the nominal value of shares. Statutory reserves are reserves such as credit risk reserves and other reserves that are normally set up according to regulatory requirements. Accumulated losses/retained earnings are the net financial results of the previous and current years.

(k) Property and equipment

Property and equipment are stated at cost, less accumulated depreciation and any accumulated impairment in value. Depreciation is calculated on the straight-line basis at annual rates estimated to write down the carrying amounts of the assets to their residual value over their expected useful lives. The depreciation expense is recognised in profit or loss.

The annual rates in use are:

Machinery and equipment	12.5%
Furniture, fixtures and fittings	12.5%
Computer and IT equipment	33.3%
Motor vehicles	25.0%
Leasehold improvements	20.0%

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset, calculated as the difference between the net disposal proceeds and the carrying amount of the asset, is included in profit or loss in the year the asset is derecognised.

The asset's residual values, useful lives and methods of depreciation are reviewed, and adjusted if appropriate, at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the depreciation period or method, as appropriate, and are treated as changes in accounting estimates.

Refer to Note 4(g) for the policy on impairment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(l) Intangible assets

Intangible assets comprise computer software licenses and other intangible assets. Intangible assets are initially recognised at cost and subsequently at cost less accumulated amortisation and impairment losses.

The useful lives of intangible assets are assessed to be finite. Intangible assets with a finite useful life are amortized using the straight-line method over their estimated useful economic life, generally not exceeding 4 - 10 years. The amortisation period and the amortisation method are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense is recognised in profit or loss.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss when the asset is derecognised.

Refer to Note 4(g) for the policy on impairment.

(m) Employees' benefits

Short-term employment benefits such as salaries, social security contributions, and leave fare assistance are recognized in profit or loss when they fall due.

Post-retirement benefits

The Bank operates a defined contribution plan whereby the employee and the Bank each contribute 10% of the employee's monthly salary to the National Social Security Fund, the state managed statutory fund. Apart from these monthly contributions, the Bank has no further commitments or obligations to the fund and it has no other postretirement benefit scheme. The contributions are charged to profit or loss in the year to which they relate.

Other employee benefits

The Bank provides free medical treatment to staff and their dependants. The cost is charged to profit or loss. The estimated monetary liability for employees' accrued leave entitlement at the reporting date is recognized as an expense accrual.

Gratuity

Certain senior personnel are entitled to gratuity payment of 25% of the employment contract at the completion of the contract. Provision is made for the gratuity in line with the respective contracts. The gratuity is a defined contribution arrangement.

(n) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the Bank Management Team, which is the chief operating decision maker for the Bank. Details of the Bank's operating segments are presented under Note 7.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(o) Leases

Accounting policies applicable under IFRS 16 Leases

The Bank assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Bank applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The lease liabilities are recognised to make lease payments and right-of-use assets representing the right to use the underlying assets.

The Bank recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at/ or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term. The useful lives for the recognised right-of-use assets are 1.5 – 16 years.

At the commencement date of the lease, the Bank recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the company and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced by the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in lease term, a change in the lease payments (e.g. change to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT

The Bank's business involves taking on risks in a targeted manner and managing the risks professionally. The core functions of the Bank's risk management are to identify the key risks for the Bank, measure these risks, manage the risk positions and determine capital allocations. The Bank regularly reviews its risk management policies and systems to reflect changes in markets, products and best market practice.

The Bank's aim is to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Bank's financial performance. The Bank defines risk as the possibility of losses or profit foregone, which may be caused by internal or external factors.

The Bank's risk management policies are established to identify and analyse the risks faced by the Bank, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The Bank, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which employees understand their roles and obligations.

The directors have overall responsibility for the establishment and oversight of the Bank's risk management framework. The Board approves written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, and liquidity risk. Risk management is carried out by the Risk and Compliance Department under policies approved by the Board. The Risk and Compliance Department evaluates financial risk in close coordination with the operating units.

The main risks arising from the Bank's financial instruments are market risk, liquidity risk and credit risk. Market risk comprises interest rate risk, foreign currency risk and price risk. The Bank does not have significant exposure to price risk as the equity investments held are not exposed to significant price risk.

Management of financial risk

The Board reviews and agrees policies for managing each of the financial risks to which the Bank is exposed. These policies are applied to the following financial instruments by category:

	At amortised cost		FVOCI	Total

¹Comprises other assets as presented in the statement of financial position excluding items that are not financial assets like prepayments and stock of stationery.

²Comprises other liabilities as presented in the statement of financial position excluding items that are not financial liabilities like statutory liabilities and deferred fees.

Excessive risk concentration

Concentration arises when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

Concentration indicates the relative sensitivity of the Bank's performance to developments affecting a particular counterparty, industry or geographical location. In order to avoid excessive concentration of risk, the directors ensure that the Bank's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio and that identified concentration of risk is controlled and managed accordingly.

5.1 Credit Risk

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from loans and advances to customers and other banks, and investments in government securities and corporate bonds. For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure.

Credit risk measurement

In measuring credit risk, the Bank reflects two components, that is, the PD by the client or counterparty on its contractual obligations and current exposures to the counterparty and its likely future development, from which the Bank derives the EAD. These credit risk measurements, which reflect ECL, are embedded in the daily operational management and are in line with IFRS 9.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.1 Credit Risk (Continued)

Credit risk measurement (Continued)

The Bank uses reasonable and supportable forward-looking information that is available without undue cost or effort in its assessment of significant increase in credit risk as well as in its measurement of ECL. External and internal information is used to generate a 'base case' scenario of future forecast of relevant economic variables along with a representative range of other possible forecast scenarios. The external information used includes economic data and forecasts published by governmental bodies and monetary authorities.

The Bank applies probabilities to the forecast scenarios identified. The base case scenario is the single most-likely outcome and consists of information used by the Bank for strategic planning and budgeting. The key drivers of credit risk and credit losses for each portfolio of financial instruments are identified and documented using a statistical analysis of historical data to estimate relationships between macro-economic variables and credit risk and credit losses.

The Bank has its internal credit rating tools tailored in accordance with the BoT guidelines. Customers of the Bank are segmented into five rating classes. The Bank's rating scale, which is shown below, reflects the range of default probabilities defined for each rating class.

Bank's rating	IFRS 9 Staging	Bank's description of the grade ¹
1	Stage 1	Current
2	Stage 1	Especially mentioned
3	Stage 2	Sub-standard
4	Stage 2	Doubtful
5	Stage 3	Loss

¹Some of the financial assets in the grades could be classified in different IFRS 9 stages depending on criteria that is specific to the financial asset.

Significant increase in credit risk

The Bank monitors financial assets that are subject to ECL to assess whether there has been a significant increase in credit risk (SICR) since initial recognition. When there is a SICR since initial recognition, a financial asset is moved from Stage 1 to Stage 2 but is not yet deemed to be credit-impaired. If the financial asset is credit-impaired, the financial asset is then moved to Stage 3. The table below summarises the 'three-stage' model for impairment based on changes in credit quality since initial recognition.

	Stage 1 (performing loans)	Stage 2 (non-performing loans)	Stage 3 (non-performing loans)
Credit risk	Financial instruments with low credit risk at the reporting date or which have not had SICR.	Financial instruments which have had a SICR since initial recognition but do not have objective evidence of a credit loss event.	Financial assets that have objective evidence of impairment at the reporting date.
Recognition of expected credit losses	12 month expected credit losses are recognized.	Lifetime expected credit losses are recognised.	Lifetime expected credit losses are recognized.
Recognition of interest	Interest revenue is calculated on the gross carrying amount of the asset.	Interest revenue is calculated on the gross carrying amount of the asset.	Interest revenue is calculated based on the amortized cost net of the ECL allowance (net carrying amount).

The Bank considers a debt instrument and loan commitment to have experienced a SICR when one or more of the following quantitative or qualitative criteria have been met:

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.1 Credit Risk (Continued)

Significant increase in credit risk (Continued)

Balances due from other banks

The qualitative factors considered as indicators of significant increase in credit risk as follows:

- Significant counterparty management restructuring due to continuous bad performance of the counterparty.
- Significant adverse change in the regulatory, economic or technology of the borrower that results in a significant change in the borrower's ability to meet its debt obligations.
- Significant reductions in financial support from a parent company that resulted to significant adverse change of operating results of the counterparty.

Loans and advances to customers and related commitments

Quantitative criteria

Based on quantitative review for the purpose of ECL calculations, loans and advances and loan commitments are classified as follows:

- **0 – 30 days to be classified as Stage 1:** Loans and advances and related commitments which are performing according to contracted terms and conditions with low credit risk at the reporting date with 12-month expected credit losses being recognised.
- **31 – 90 days to be classified as Stage 2:** Loans and advances and related commitments which have had significant increase in credit risk since initial recognition but do not have objective evidence of credit loss event with lifetime expected credit losses being recognised.
- **91 days or more to be classified as Stage 3:** Loans and advances and related commitments which have objective evidence of impairment at the reporting date with lifetime expected credit losses being recognized (credit-impaired assets).

Qualitative criteria

For personal loans, if the borrower meets one or more of the following criteria:

- Short-term forbearance or restructuring.
- Adverse changes of external data from credit references agencies.

For corporate and SME portfolios, if the borrower is on the watch list (especially mentioned) and/or the instrument meets one or more of the following criteria:

- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates.
- Actual or expected forbearance or restructuring.
- Actual or expected significant adverse change in operating results of the borrower.
- Significant change in collateral value which is expected to increase risk of default.
- Early signs of cash flow/liquidity problems such as delay in servicing of trade creditors/loans.
- Significant adverse changes in political, regulatory and technological environment of the borrowers or in its business activities.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.1 Credit Risk (continued)

Risk limit control and mitigation policies

The Bank manages limits and controls concentrations of credit risk wherever they are identified, in particular, to individual counterparties, groups, and industries. The Bank structures the levels of credit risk undertaken by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary.

The exposure to any one borrower including banks is further restricted by sub-limits covering on- and off-statement of financial position exposures. Actual exposures against limits are monitored daily. Exposure to credit risk is also managed through weekly analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits, where appropriate. Other specific control and mitigation measures are outlined below.

Collateral

This is the most traditional of the approaches applied to manage credit risk and involves taking of security for funds advanced, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation.

The principal collateral types for loans and advances to customers are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable;
- Charges over financial instruments such as debt securities and equities.

In order to minimise credit loss, the Bank will seek additional collateral from the counterparty as soon as impairment indicators are noticed for a facility.

Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Loan commitments carry the same credit risk as loans and advances. Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss of the amounts equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

Internal reviews and audits

Regular audit of the Credit Department processes is undertaken by the Internal Audit Department.

Internal credit ratings

The internal rating scale assists the directors to determine whether objective evidence of impairment exists under IFRS 9, based on the following criteria set out by the Bank:

- Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower;
- Breach of loan covenants or conditions; and,
- Deterioration in the value of collateral.

The Bank's policy requires the review of individual financial assets regularly and monitoring is on monthly basis.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.1 Credit Risk (continued)

Maximum exposure to credit risk

The maximum exposure to credit risk in respect to loans and advances to customers before collateral held or other credit enhancements is analysed as follows:

Bank's rating	2020		2019	
	Credit risk exposure	ECL allowance	Credit risk exposure	ECL allowance
	%	%	%	%
Current	88	18	77	14
Especially mentioned	1	7	1	32
Substandard	4	32	2	13
Doubtful	1	12	11	19
Loss	6	49	9	22
	100	100	100	100

The directors are reasonably confident in the ability to continue to control and mitigate exposure to credit risk resulting from both the exposures for which the Bank holds collateral and other credit enhancements and for which none is held.

The carrying amounts which represent the maximum exposure to credit risk, including those for which no collateral or other credit enhancements are held, are indicated below:

	2020		2019	
	TZS'000	%	TZS'000	%
Cash and balances with BoT	12,899,841	6%	12,229,817	6.6%
Loans and advances to banks	35,819,174	18%	23,235,028	12.5%
Other assets	750,089	0%	715,268	0.4%
Government securities	28,037,348	14%	23,780,209	12.8%
Investment in corporate bond	2,002,258	1%	2,002,220	1.1%
No collateral held	79,508,672	40%	61,962,542	33.3%
Loans and advances to customers	121,381,392	60%	122,083,704	65.6%
Loan commitments	1,594,779		2,149,314	1.2%
With collateral or other credit enhancements	122,976,171	60%	124,233,018	66.7%
Maximum exposure to credit risk	202,484,843	100.0%	186,195,560	100.0%

The above exposures are before considering the value of collateral held.

Credit exposure per industry sector

The following table indicates the Bank's credit exposure at carrying amounts, without taking into account any collateral held or other credit support, as categorized by the industry sectors of the Bank's counterparties.

MIKOMBOZI COMMERCIAL BANK PLC

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.2 Market Risk

The Bank takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions on interest and foreign currency positions, both of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates and foreign exchange rates. The Bank separates exposures to market risk into either trading or non-trading portfolios. The market risks arising from trading and non-trading activities are monitored regularly by the Bank's treasury department. Regular reports are submitted to the Board and Management Team.

The objective of market risk measurement is to manage and control market risk exposures within acceptable limits while optimising the return on risk. The principal measurement technique used to measure, and control market risk is stress testing as outlined below:

Stress testing: Stress tests provide an indication of the potential size of losses that could arise in extreme conditions. The stress testing carried out by the Bank covers: interest rate, credit, foreign exchange and liquidity risks, where stress movements are applied to each risk category to assess the overall impact and the Bank's capital resilience to different market risk factor shocks. The results of the stress tests are reviewed by the Asset and Liability Management Committee (ALCO) and reported to the Board.

Foreign exchange risk

The Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board sets limits on the level of exposure by currency which is monitored daily. The Bank's exposure to foreign currency risk was as follows:

<i>All amounts are in TZS'000</i>

MKOMBOZI COMMERCIAL BANK PLC

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.2 Market Risk (continued)

Foreign exchange risk (Continued)

The following table details the Bank's sensitivity to a 5% increase and decrease in the USD to TZS rate. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis is done for USD as this is the main foreign currency used by the Bank and considers only outstanding monetary items denominated in USD. A positive number indicates an increase in profit and equity while a negative number indicates the reverse.

	Change in USD:TZS rate	Amounts in TZS'000	
		(Loss)/profit before tax sensitivity	Equity sensitivity
At 31 December 2020			
Foreign exchange rates	+5%	(5,042)	(3,529)
	-5%	5,042	3,529
At 31 December 2019			
Foreign exchange rates	+5%	(2,782)	(1,947)
	-5%	2,782	1,947

Potential exposure to other foreign currencies is not considered significant.

Interest rate risk

The Bank is exposed to various risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of changes in the prevailing levels of market rates but may also decrease or create losses in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest re-pricing that may be undertaken. Consequently, the interest sensitivity effects on profit or loss would not be significant given the re-pricing frequency.

With all other variables held constant, a change in interest rates by +/- 100 basis points on interest-bearing financial assets and liabilities would have resulted in lower/higher results before tax and equity as indicated below:

	Change in interest rates	Amounts in TZS'000	
		(Loss)/profit before tax sensitivity	Equity sensitivity
At 31 December 2020			
Market interest rates	+1%	40,220	28,154
	-1%	(40,220)	(28,154)
At 31 December 2019			
Market interest rates	+1%	1,006,537	704,576
	-1%	(1,006,537)	(704,576)

The table below summarizes the exposure to interest rates risks. Included in the table are the Bank's financial assets and liabilities at carrying amounts categorized by the earlier of contractual re-pricing or maturity dates. The Bank does not bear interest rate risk on off statement of financial position items.

FOR THE YEAR ENDED 31 DECEMBER 2020**

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.3 Liquidity Risk

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

The Bank's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its obligations when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Bank's reputation.

The Bank's treasury department maintains a portfolio of short-term liquid assets, largely made up of short-term liquid Government securities, loans and advances due from other banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Bank as a whole. The liquidity policies and procedures are subject to review by the Assets and Liabilities Committee and approval by the Board.

The Bank manages the liquidity structure of assets, liabilities and commitments so that cash flows are appropriately matched to ensure that the funding obligations are met when due. Banking operations are such that mismatch of assets and liabilities according to their maturity profiles cannot be avoided. However, the directors ensure that the mismatch is controlled in line with allowable risk levels. Liquidity management processes include:

- Day-to-day funding managed by monitoring future cash flows to ensure that requirements can be met. These include replenishment of funds as they mature or are borrowed by customers. The Bank maintains an active presence in money markets to enable this to happen;
- Maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any unforeseen interruption to cash flow;
- Monitoring statement of financial position liquidity ratios against internal and regulatory requirements; and
- Managing the concentration and profile of debt maturities.

Monitoring and reporting take the form of gap analysis, maturity ladder as well as cash flow measurement and projections for the next day, week and month as these are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

Sources of liquidity are regularly reviewed by the Bank to maintain a wide diversification by currency, provider, product and term.

The table below presents the cash flows payable by the Bank under non-derivative financial liabilities by remaining contractual maturities at the reporting date. The amounts disclosed are the contractual undiscounted cash flows as liquidity is managed on this basis.

MKOMBOZI COMMERCIAL BANK PLC

Total financial liabilities	107,827,047	5,344,808	21,058,960	72,404,527	206,635,342

The undrawn loan commitments as at 31 December 2020 and 31 December 2019 were due within one year.

In the normal course of business, a proportion of customer loans contractually repayable within one year will be extended. The Bank would be able to meet unexpected net cash outflows by selling investment securities and accessing additional funding sources such as equity and external borrowing.

5.4 Fair value measurement

The fair values of the Bank's financial instruments reasonably approximate the carrying amounts because:

Debt instruments at amortised cost

These are either short term or long-term instruments which have interest rates that reasonably approximate prevailing market rates.

Equity investments

Share sales transactions by the issuers of the equity investments done at or about the reporting date did not differ materially from the share prices at which the Bank purchased and continues to carry the equity investments.

Fair value hierarchy

IFRS 13 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Bank's market assumptions. These two types of inputs form the basis for the following fair value hierarchy:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.

MKOMBOZI COMMERCIAL BANK PLC

NOES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4 Fair value measurement (Continued)

Fair value hierarchy (Continued)

- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components. This hierarchy requires the use of observable market data when available. The Bank considers relevant and observable market prices in its valuations where possible.

The following represents the Bank's assets that were measured at fair value:

	TZS '000			
	Level 1	Level 2	Level 3	Total
At 31 December 2020				
Equity investments	-	500,000	39,000	539,000
31 December 2019				
Equity investments	-	500,000	39,000	539,000

The equity investments are valued using transaction prices for the same or similar investments done at or close to the reporting period. There were no transfers between levels during 2020 and 2019.

Refer to Note 24 for further disclosures on fair value.

5.5 Capital management

The primary objectives of the Bank's capital management which is a broader concept than the 'equity' in the statement of financial positions are:

- To comply with the regulatory capital requirements set by the Banking and Financial Institutions Act, 2006 (the "Act") and related regulations;
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders;
- To maintain a strong capital base to support the development of its business;
- To ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business; and,
- To maximize shareholders' value.

Regulatory capital requirements

The regulatory capital requirements are stipulated in the Act and the related regulations, that is, The Banking and Financial Institutions (Capital Adequacy) Regulations, 2014 and The Banking and Financial Institutions (Capital Adequacy) (Amendment) Regulations, 2015. The Act and related regulations set, among other measures, the ratios and rules for monitoring adequacy of capital. These include requirements that a supervised bank shall at all times maintain:

- Minimum core capital of not less than TZS 15 billion.
- A ratio of core capital to the risk-weighted assets plus risk-weighted off-statement of financial position assets (the 'Basel ratio') plus market risks and operational risk charges at or above the required minimum of 12.5%.

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.5 Capital management (Continued)

- c) A ratio of total capital of not less than 14.5% of the risk-weighted assets plus risk-weighted off-statement of financial position items plus market risks and operational risk charges.

The Bank's regulatory capital as managed by its Treasury Department is divided into two tiers:

- Tier 1 capital: share capital, retained earnings and reserves created by appropriations of retained earnings. Intangible assets other than software, deferred tax assets and prepaid expenses are deducted in arriving at Tier 1 capital; and
- Tier 2 capital: qualifying subordinated loan capital and regulatory general provisions for loans and advances.

The risk-weighted assets are measured by means of a hierarchy of five risk weights classified according to the nature of, and reflecting an estimate of credit, market and other risks associated with, each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-statement of financial position exposure, with some adjustments to reflect the more contingent nature of the potential losses.

Limits are applied to elements of the capital base, for example, qualifying tier 2 capital cannot exceed tier 1 capital; and qualifying term subordinated loan capital may not exceed 50 percent of tier 1 capital.

The Banking and Financial Institutions (Credit Concentration and Other Exposures Limits) Regulations, 2014 prescribe limits for credit concentration and other exposures basing on core capital as the determinant of the limits. These include single borrower's limits, aggregate large exposure limits, equity investments limits, among others.

BoT monitors capital requirements for the supervised banks and financial institutions as a whole. Capital adequacy and the use of regulatory capital are monitored daily by the Bank's management, employing techniques based on the guidelines implemented by BoT for supervisory purposes. The required information is filed with BoT on a quarterly basis.

MKOMBOZI COMMERCIAL BANK PLC

**NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020**

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.5 Capital management (Continued)

The table below summarises the composition of regulatory capital and the Bank's capital adequacy ratios as at 31 December 2020 and 31 December 2019.

	2020	2019
	TZS'000	TZS'000
Tier 1 capital		
Share capital	20,615,272	20,615,272
Accumulated losses	(3,573,857)	(11,323,848)
Less:		
Intangible assets ¹	-	-
Prepaid expenses	(618,110)	(685,031)
Lease hold improvements	-	-
Deferred tax asset	-	-
Total qualifying Tier 1 capital	16,423,305	8,606,393
Tier 2 capital		
General reserve ²	-	-
Total qualifying Tier 2 capital	-	-
Total regulatory capital	16,423,305	8,606,393
Risk - weighted assets		
On statement of financial position risk weighted assets ³	135,596,529	138,232,936
Off statement of financial position risk weighted exposures	1,594,779	2,149,314
Total adjusted capital required for operational risk	10,792,243	8,873,650
Total adjusted capital required for market risk	270,565	194,518
Total risk-weighted on and off statement of financial position, operational and market risk weighted exposures	148,254,116	149,450,418
Capital adequacy ratio	%	%
Tier 1 (Regulatory required minimum ratio 12.5%)	11.08%	5.76%
Tier 1 + Tier 2 (Regulatory required minimum ratio 14.5%)	11.08%	5.76%

There were no changes in the regulatory capital requirements during the year. However, BoT made the following pronouncements which impact how the capital requirements are calculated:

¹Abolishing, on 3 July 2019, the requirement to deduct the carrying amount of the investment in computer software when calculating core and total capital. Previously, the amount was directly deducted when calculating core and total capital.

²Abolishing, on 3 July 2019, the requirement for 1% general provision on unclassified loans. The general provision reserve was previously part of tier 2 capital.

³Guiding, on 2 April 2020, that right-of-use assets should be treated as tangible assets by applying a risk weight consistent with the risk weight that would be applied to the underlying asset if owned or acquired.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020**

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.5 Capital management (continued)

As at 31 December 2020, the Bank's core capital ratio and total capital ratio were 11.08% and 11.08% (2019: 5.76% and 5.76%), compared with the minimum regulatory requirements of 12.5% and 14.5%, respectively. The Banking and Financial Institutions (Prompt Corrective Actions) Regulations, 2014 stipulate the actions to be taken by BoT in dealing with undercapitalised banks. The actions depend on whether a bank is undercapitalised (core capital ratio of below 12.5%), significantly undercapitalised (core capital ratio of less than 8.5%) or critically undercapitalised (core capital ratio of less than 6.5%). The following are the stipulated mandatory actions to be taken by BoT for undercapitalised banks:

- Requiring the bank to submit within such reasonable period as BoT may specify, a written plan for corrective action which identifies the existing weaknesses in the administration or operation of the bank, determines in detail the corrective measures required to remedy such weaknesses and offers a realistic time-table for implementing such measures;
- Prohibiting the bank from declaring and paying any dividends which would, in the opinion of BoT, likely cause the bank to fail to comply with the requirements prescribed under the Banking and Financial Institutions (Capital Adequacy) Regulations;
- Intensify its oversight and monitoring of the bank or financial institution in accordance with the principles of risk-based supervision;
- Directing the bank to submit within thirty days from the date of the directive, or such period as BoT may specify, a capital restoration plan which will ensure that the bank becomes adequately capitalised within such period as may be prescribed by BoT;
- BoT may appoint a suitably qualified person who shall advise and assist the bank in designing and implementing the capital restoration plan; and regularly submit to the BoT a progress report of the plan.
- BoT shall fix remuneration of the person appointed as the qualified person who will advise and assist the bank in designing and implementing the capital restoration plan and the bank shall pay such remuneration.

BoT shall, within thirty days after receiving a capital restoration plan, provide a written notice to the bank of whether the capital restoration plan has been approved or rejected. Where a capital restoration plan has not been approved by BoT, a bank shall submit a revised capital restoration plan within a period specified by BoT. Upon receiving notice that its capital restoration plan has not been approved by BoT, an undercapitalised bank shall be subject to any other actions that BoT may determine until such time as a new or revised capital restoration plan submitted by the bank has been approved by BoT.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020**

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.5 Capital management (continued)

Without prejudice to the penalties and actions prescribed in the Banking and Financial Institutions Act, 2006 of Tanzania, BoT may impose on an undercapitalized bank a penalty of the amount to be determined by BoT; disqualification of the bank's directors, officers or employees from holding any position or office in any bank or financial institution under the supervision of BoT.

The capital position is dependent on the inputs into the calculations as indicated above which include financial results, issued share capital position and level of risk weighted assets. The capital position is sensitive to changes in the absolute core capital position with higher impact being through additional equity and/or financial results, with profitability improving the ratios and vice versa.

The Bank's directors and management have prepared a capital restoration plan to be submitted to BoT for approval. The main elements of the plan comprise:

- Capital mobilization initiatives led by the Bank's anchor shareholder, Tanzania Episcopal Conference (TEC), aimed at raising additional equity of TZS 15 billion. This is in accordance with the May 2019 Annual General Meeting (AGM) resolution to raise this additional capital to meet the following needs: support strategic business growth and modernization initiatives; and meet regulatory compliance including covering the IFRS 9 and IFRS 16 impact on capital. Some offshore potential investors have been approached and preliminary discussions are ongoing with those who expressed interest in investing in the Bank. TEC is also working on options to raise own funds to invest additional equity in the Bank. The outbreak of the Covid-19 pandemic has slowed down the process as the potential investors are from the European countries affected by the pandemic.
- Turning around key non-performing loans which are expected to result into reversal of the regulatory provisions leading to the regulatory reserve. The non-performing loans are expected to be turned around through disposal of collateral and/or restructuring of the loans. The positive turnaround of this portfolio will lead to reversing of the regulatory provisions thus enhancing the capital position.
- Quality management of the existing loan book and ensuring quality loan origination processes. This, in addition to cost management initiatives, is expected to enhance profitability and growth.

The shareholders, directors and management are committed to ensuring that the capital restoration plan is executed as quickly as possible in order to return the Bank back to regulatory capital compliance, profitability and sustainable growth.

6. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Bank's financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Bank's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments

In the process of applying the Bank's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognised in the financial statements:

Going concern assessment

In the process of applying the Bank's accounting policies, the Bank's management and directors have made significant judgements in determining that the Bank will successfully implement its business and capital restoration plans and will consequently continue in existence for the foreseeable future. Refer to Note 2.2 for further details on going concern.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

6. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

Judgments (Continued)

Business model assessment

The business model reflects how the Bank manages its assets in order to generate cash flows. That is, whether the Bank's objective is solely to collect the contractual cash flows from the asset or to collect both contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of 'other' business model and measured at FVPL. Factors considered by the Bank in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel and how risks are assessed and managed.

Refer to Note 5 for the disclosures of financial instruments by category.

Significant increase of credit risk (SICR)

SICR is assessed by comparing the risk of default of an exposure at the reporting date to the risk of default at origination (after taking into account the passage of time). Whether a change in the risk of default is significant or not is assessed using quantitative factors, that is, financial assets that are 30 or more days past due and not credit-impaired will always be considered to have experienced a SICR. Financial assets that are 30 or less days past due are considered to have low credit risk. The Bank considers other qualitative factors that reasonably reflect SICR.

Refer to Notes 5 and 21 for further disclosures on the financial assets subject to ECL.

Deferred tax assets

Deferred tax assets are recognised in respect of tax losses and tax credits to the extent that it is probable that future taxable profit will be available against which the tax losses and credits can be utilised. Judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits, together with future tax-planning strategies.

Refer to Note 28 for further disclosures on deferred tax.

Potential impact of the Covid-19 pandemic

Refer to Notes 2.2, 5.5 and 40 for further disclosures related to the pandemic.

Fair value of financial instruments

The fair value of financial instruments where no active market exists or where quoted prices are not otherwise available are determined by using valuation techniques. In these cases, the fair values are estimated from observable data in respect of similar financial instruments or using models. Where market observable inputs are not available, they are estimated based on appropriate assumptions. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by management. Changes in valuation assumptions could affect the reported fair value of the financial instruments.

Refer to Note 5.4 for further disclosures on fair value measurements.

6. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)**Estimates and assumptions**

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next period. All estimates and assumptions required are in conformity with IFRS and are the best estimates undertaken in accordance with the relevant standard.

Determination of ECL allowances

The measurement of ECLs under IFRS 9 across all categories of financial assets requires judgement and estimations. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The ECL calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. The elements of the ECL models that are considered accounting judgements and estimates are indicated below:

- Cure rate: Cure rate is a percentage of credit exposure accounts which were in default category, but as at assessment date have moved to a better category. Cure rate is factored in at the LGD level when assessing recovery rate. The rate reduces the percentage of LGD and is computed at the overall credit portfolio level. Consideration of movement of accounts is done annually. Qualitative criteria applied when checking whether the account has cured or not are those in line with BoT guidelines on IFRS 9 implementation. Accounts in default which are assessed whether they have cured exclude accounts which have been restructured or which have been charged off during the period.
- Incorporation of forward-looking information: The evolving economic environment is a key determinant of the ability of the Bank's clients to meet their obligations as they fall due. It is a fundamental principle of IFRS 9 that the provisions held against potential future credit risk losses should depend not just on the health of the economy today but should also take account of changes to the economic environment in the future. To capture the effect of changes to the economic environment in the future, the computation of PD and LGD and hence ECLs incorporates forward-looking information. This includes assumptions on the path of economic variables and asset prices that are likely to have an effect on the repayment ability of the Bank's clients. Such variables include inflation, GDP growth rates, oil prices fluctuation, average electricity generation, natural gas, population, total household spending, total food sales, total public debt, Government spending in priority sectors, unemployment rate, exchange rate movement, among others.

Refer to Notes 5.1 and 21 for further disclosures on ECLs.

Useful lives, depreciation methods and residual values of property and equipment, intangible assets and right-of-use assets

The Bank reviews the estimated useful lives, depreciation methods and residual values of property and equipment, intangible assets and right-of-use assets at the end of each annual reporting period. Factors considered when reviewing the useful lives and residual values include:

- The expected usage of the asset by the Bank, which is assessed by reference to the asset's expected capacity;
- The expected physical wear and tear, which depends on operational factors, the repair and maintenance programme of the Bank, and the care and maintenance of the asset while idle; and,
- Legal or similar limits on the use of the asset, such as the expiry dates of related leases.

Refer to Notes 25, 26 and 27 for the carrying amounts of the right-of-use assets, intangible assets and property and equipment.

6. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (Continued)

Estimates and assumptions (Continued)

Incremental borrowing rate

The Bank cannot readily determine the interest rate implicit in the lease, therefore, it uses its IBR to measure lease liabilities. The IBR is the rate of interest that would have to be paid to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Bank “would have to pay”, which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Bank estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific adjustments (such as the credit spread, debt-service ratio, inflation to reflect the terms and conditions of the lease).

Refer to Note 33 for further details.

Determining the lease term of contracts with renewal and termination options

The Bank determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Bank’s lease contracts include extension and termination options. The Bank applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease contracts. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Bank reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customization to the leased asset).

The Bank includes the renewal period as part of the lease term for the leases recognised. The Bank typically exercises its option to renew for leases because there will be a significant negative effect on operations if a replacement asset is not readily available. The renewal periods for leases are not included as part of the lease term if they are not reasonably certain to be exercised. Furthermore, the periods covered by termination options are included as part of the lease term only when they are reasonably certain not to be exercised.

Refer to Notes 25 and 33 for further details.

Impairment of non-financial assets

The Bank assesses whether there are any indicators of impairment for all non-financial assets at each reporting date. Non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

Refer to Notes 25, 26 and 27 for the carrying amounts of the non-financial assets.

NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020

7. OPERATING SEGMENTS

Operating segments are reported in a manner consistent with the internal reporting to the Bank's Management Team, which is the equivalent of the Chief Operating Decision-Maker and is responsible for allocating resources to the reportable segments and assessing their performances. The agreed allocation basis between operating segments did not changed during the year.

The following business segments represent the Bank's organization structure as reflected in the internal management reporting system:

Treasury

Includes treasury services, investment management services and asset management activities related to dealing, managing and custody of securities.

Retail banking

Includes services and products to individuals and small and medium enterprises, including deposits and lending.

Other

Includes services and products other than treasury and retail banking.

All the Bank's assets are domiciled in Tanzania. There was no revenue from a single customer that was 10% or more of the total reported revenue.

Security costs	405,101	453,796
Data connectivity and bank charges	595,843	552,730
Printing and stationery	248,686	453,033
Repairs and maintenance of office equipment	228,155	216,890
Excise duty on commissions	287,132	234,645
Other operating costs ¹	1,261,545	1,488,619
	<u>5,429,396</u>	<u>6,597,826</u>

¹Other operating costs include publication expenses, donations, loss on disposal/write off of assets, and general office administration expenses.

16. INCOME TAX

Income tax expense

Current income tax – current year	-	-
Deferred tax credit – current year (Note 28)	-	-
Deferred tax charge – deferred tax asset derecognised (Note 28)	-	1,144,631
	<u>-</u>	<u>1,144,631</u>

The tax on the Bank's (loss)/profit before tax differs from the theoretical amount that would arise using the basic tax rate as follows:

Profit/(loss) before tax	3,849,888	(5,438,302)
Tax calculated at a tax rate of 30% (2019: 30%)	1,154,966	(1,631,491)
<i>Tax effect of:</i>		
Expenditure permanently disallowed	(107,166)	21,000
Non-qualifying capital expenditure	8,057	13,697
Income taxed at source (dividend and other income)	-	(20,971)
Deferred tax credit not recognised (Note 28)	(1,055,857)	1,617,765
Derecognition of deferred tax asset (Note 28)	-	1,144,631
	<u>-</u>	<u>1,144,631</u>

Current income tax recoverable

At 1 January	(408,850)	(78,939)
Payments during the year	(232,832)	(329,911)
Current income tax charge for the year	-	-
At 31 December	<u>(641,682)</u>	<u>(408,850)</u>

MKOMBOZI COMMERCIAL BANK PLC

**NOTES TO THE FINANCIAL STATEMENTS (Continued)
FOR THE YEAR ENDED 31 DECEMBER 2020**

17. EARNINGS /(LOSS)PER SHARE

Basic earnings/(loss) per share is calculated by dividing the (loss)/profit for the year attributable to ordinary equity holders of the Bank by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings/(loss) per share is calculated by dividing the the profit/(loss) for the year attributable to ordinary equity holders of the Bank by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

There were no dilutive potential ordinary shares. As such, basic and diluted earnings/loss per share are the same as follows:

	<u>2020</u>	<u>2019</u>
Profit/(loss) attributable to ordinary shareholders (TZS'000)	3,849,888	(6,582,933)
Weighted average number of ordinary shares (Note 34)	20,615,272	20,615,272
Basic and diluted earnings /(loss) per share (TZS)	<u>187</u>	<u>(319)</u>

18. CASH AND BALANCES WITH THE BANK OF TANZANIA

Cash in hand	9,188,261	8,744,001
Balances with BoT - Current accounts	2,221,771	3,714,217
Balances with BoT - Statutory minimum reserve (SMR)	10,678,070	8,515,600
	<u>22,088,102</u>	<u>20,973,818</u>

Cash in hand and balances with BoT are non-interest bearing. The SMR is not available for the Bank's day-to-day operations and is hence excluded from cash and cash equivalents for the purpose of the statement of cash flows (Note 36).

19. LOANS AND ADVANCES TO BANKS

	<u>2020</u> TZS'000	<u>2019</u> TZS'000
Balances with other banks	11,958,841	7,006,691
Cheques in the course of collection with other banks	209,163	215,224
Placements with other banks	23,658,065	16,024,623
	<u>35,826,069</u>	<u>23,246,538</u>
Expected credit losses	(6,895)	(11,510)
Current	<u>35,819,174</u>	<u>23,235,028</u>

The table below shows the credit quality and the maximum exposure to credit risk based on the Bank's internal credit rating system and year-end stage classification. The amounts presented are gross of ECL allowances. Details of the Bank's internal grading system are explained in Note 5 and the accounting policies on determination of ECL allowances are in Note 4.

Internal credit rating: Performing – current category

	Stage 1
At 1 January	23,246,538
Originated during the year	14,570,918
Interest accrued	705,430
Received during the year	(2,696,817)
At 31 December	<u>35,826,069</u>
	<u>23,246,538</u>

ECL allowance

At 1 January	11,501
Increase during the year	(4,606)
At 31 December	<u>6,895</u>
	<u>11,501</u>

MKOMBOZI COMMERCIAL BANK PLC

**NOTES TO THE FINANCIAL STATEMENTS (Continued)

24. EQUITY INVESTMENTS

	<u>2020</u> TZS'000'	<u>2019</u> TZS'000'
Umoja Switch Co. Ltd	39,000	39,000
TMRC	500,000	500,000
	<u>539,000</u>	<u>539,000</u>

The equity investments are classified as financial assets at fair value through other comprehensive income (FVOCI).

In 2014, the Bank acquired 8.67% of the ordinary shares of Umoja Switch Co. Ltd and was one of the founder members of this entity.

In 2018, the Bank acquired 308,261 ordinary shares of TMRC. As at year-end, the Bank's equity investment was 1.67% of the TMRC issued share capital. The directors have determined that the fair value of the equity investment remained as TZS 1,622 per share as at 31 December 2020 and 31 December 2019 basing on share sales transactions done by TMRC at the same price close to these dates.

25. RIGHT-OF-USE ASSETS

	<u>2020</u> TZS'000'	<u>2019</u> TZS'000'
Cost

33. LEASE LIABILITIES (Continued)

Maturity analysis for the lease liability:

Due in 1 year

Due after 1 year

	<u>2020</u>	<u>2019</u>
	<u>TZS'000</u>	<u>TZS'000</u>
	582,208	663,670
	3,334,682	3,933,447
	<u>3,916,890</u>	<u>4,597,117</u>

The following were the expenses charged to profit or loss in respect to lease arrangements:

	<u>2020</u>	<u>2019</u>
	<u>TZS'000</u>	<u>TZS'000</u>
Occupancy costs - short term lease arrangements (Note 15)	448,641	481,904
Depreciation of right-of-use asset (Note 25)	678,986	779,642
Lease liabilities interest accretion (Note 9)	647,036	559,995
	<u>1,774,663</u>	<u>1,821,541</u>

34. SHARE CAPITAL

Authorised

50,000,000 ordinary shares of TZS 1,000 each

	<u>50,000,000</u>	<u>50,000,000</u>
--	-------------------	-------------------

Issued and fully paid ordinary shares

20,615,272 shares of TZS 1,000 each

	<u>20,615,272</u>	<u>20,615,272</u>
--	-------------------	-------------------

35. REGULATORY AND GENERAL RESERVES

At 1 January 2020

Transfer to retained earnings

At 31 December 2020

At 1 January 2019

Transfer from retained earnings

At 31 December 2019

	<u>Regulatory</u>	<u>General</u>	<u>Total</u>
	<u>TZS'000</u>	<u>TZS'000</u>	<u>TZS'000</u>
	7,431,623		7,431,623
	(3,900,305)	-	(3,900,305)
	<u>3,531,318</u>	<u>-</u>	<u>3,531,318</u>
	11,455	780,919	792,374
	7,420,168	(780,919)	6,639,249
	<u>7,431,623</u>	<u>-</u>	<u>7,431,623</u>

The general reserve represented a regulatory 1% general provision on loans and advances classified as current. This was considered part of the Tier 2 capital as stipulated in the Bank of Tanzania (BOT) prudential guidelines. This reserve was not available for distribution to the equity holders. The requirement for this reserve was abolished effective from July 2019.

The regulatory reserve relates to the excess of the regulatory provisions for loans and advances above the IFRS 9 provisions. The regulatory provisions and reserve are determined in accordance with the Banking and Financial Institutions prudential regulations and guidelines. The reserve is not available for distribution to the shareholders and is excluded when determining regulatory core capital.

Regulatory provisions

Less: IFRS ECL allowance (Note 21)

	<u>47,229,206</u>	<u>35,693,246</u>

37. RELATED PARTIES

The Bank's issued share capital is owned as follows:

Shareholder category	2020	2019
Church dioceses and affiliated institutions	28%	28%
Other institutions	10%	10.3%
Tanzania Episcopal Conference (TEC)	20%	20.1%
Individuals (general public)	42%	41.6%
	<u>100%</u>	<u>100%</u>

The following were the balances and transactions with related parties:

	<u>2020</u> TZS'000	<u>2019</u> TZS'000
Loans due from key management personnel		
At 1 January	808,666	1,023,834
Loans advanced during the year	-	217,672
Loan repayments during the year	(265,607)	(432,840)
At 31 December	<u>543,058</u>	<u>808,666</u>

These loans are salary secured. The interest rates charged are in line with prevailing market rates for similar loans.

Interest income earned on loans due from key management personnel

32,062	63,897
---------------	---------------

Deposits due to directors and key management personnel

At 1 January	340,068	209,235
Deposits received during the year	2,234,561	2,329,321
Deposits repaid during the year	(2,293,618)	(2,198,488)
At 31 December	<u>281,010</u>	<u>340,068</u>

The deposits are on the Bank's normal commercial terms.

Compensation for key management personnel

Salaries and other short-term benefits	1,117,280	1,167,500
Post-employment benefits – Social security contributions	111,728	116,750
Gratuity (Note 32)	346,833	282,500
	<u>1,575,841</u>	<u>1,566,750</u>

Directors' remuneration (Note 15)

<u>64,000</u>	<u>61,000</u>
----------------------	----------------------

Key management personnel comprise the persons having authority and responsibility for planning, directing, and controlling the activities of the Bank, directly or indirectly, including heads of department.

MKOMBOZI COMMERCIAL BANK PLC

NOTES TO THE FINANCIAL STATEMENTS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

38. COMMITMENTS

	<u>2020</u>	<u>2019</u>
Capital commitments	TZS'000	TZS'000
Capital expenditure that has been approved by the Board but not contracted for:	<u>3,482,202</u>	<u>4,885,169</u>

The capital commitments as at year-end comprise TZS 1.3 billion for relocating to new premises, TZS 950 million for digital channels development, transaction monitoring systems and other computer software; TZS 593 million for a replacement switches, old computer hardware and replica servers for core banking system.

Commitments to extend credit - undrawn loan commitments

Commitments to extend credit represent contractual commitments to advance loans and revolving credits to customers. Commitments generally have fixed expiry dates, or other termination clauses. Since commitments may expire without being drawn upon, the total contract amounts do not necessarily represent future cash requirements. However, the potential credit loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific standards.

The Bank had the following commitments:

Undrawn commitments to lend

<u>1,594,779</u>	<u>2,149,314</u>
------------------	------------------

The undrawn commitments to lend were under the current grade (Stage 1) credit risk category.

39. CONTINGENT LIABILITIES

The Bank had no contingent liabilities as at year-end (2019: None).

40. EVENTS AFTER THE REPORTING PERIOD

Capital restoration plan

Following the undercapitalization of the Bank, management and the directors embarked on preparing a capital restoration plan and engaging stakeholders regarding the sufficiency of the plan. The capital restoration plan is expected to be submitted to BoT for approval. Refer to Note 5.5 for further disclosures.

Covid-19 pandemic

The COVID-19 pandemic continued to affect countries and businesses at the time of issuing these financial statements. The risks arising from this pandemic could include market, services and supply chain disruptions, unavailability of key personnel, locations being quarantined, and increase credit risk, among others. The Bank's directors and management have assessed that, at the time of issuing these financial statements, it was impracticable to determine and disclose the quantitative extent of the possible effects of the pandemic on the Bank. The directors and management have qualitatively assessed the potential impact of the pandemic as follows:

MIKOMBOZI COMMERCIAL BANK PLC

NOTES TO THE FINANCIAL STATEMENTS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2020

40. EVENTS AFTER THE REPORTING PERIOD (Continued)

Covid-19 pandemic (Continued)

- The Bank's loan portfolio composition, which is the mainstream revenue, constitutes limited direct exposures to export-oriented businesses and the significantly impacted sectors such as tourism, horticulture, hospitality and air travel. This limits the direct risk which comes with the pandemic. However, there could be an indirect impact due to value chain linkages with the downstream small and medium enterprises and consumer segments which constitute the Bank's customer base.
- The Bank's exposures are reasonably well spread-out in local trading and service sectors, for example, in education sector for which the recovery rate could be much faster post the pandemic given that necessity of the education services.
- On the liquidity aspect, which is another key pillar of the business, no significant negative impact is expected mainly because of the nature and structure of the liabilities and the liquidity investment portfolio base. Management will continue to take necessary mitigations including close monitoring of key liquidity metrics like liquidity outflows, close and tight management of positions and intraday flows, slowing down/prioritizing lending in order to minimize the risk of default and liquidity distress, and managing the loan portfolio closely in order to take necessary performance remedial actions timely.
- Safety will continue to be a priority. The Bank will continue to follow the Government guidelines in ensuring the safety of the people and customers. A two-group rotational weekly work shift will continue as long as necessary to mitigate the risk of having to stop service should a Covid-19 case be diagnosed among the work force.
- As disclosed in Notes 2.2 and 5.5, the pandemic could delay or otherwise negatively impact the implementation of the Bank's capital restoration plan.

The Bank's directors and management consider that it is reasonably possible, based on existing knowledge, that outcomes within the next financial year that are different from the judgements and assumptions used, could require material adjustments to the carrying amounts of the assets or liabilities reported in the financial statements. The Bank's directors and management will continue to manage the business closely during the pandemic including taking all necessary remedial actions to ensure continuity of the business. However, it is expected that overall, the consequences of this pandemic shall have a negative impact on the Bank's business growth momentum and in achieving the desired performance targets in the short to medium term.

Other events

There were no other events after the reporting that required adjustment to or disclosure in the financial statements.
